ECIA and the ECIA Foundation

Our members manufacture and sell electronic components. We love working with FIRST® in a number of ways:

- Drive awareness of the competition and guide member companies – potential team sponsors and mentors! – to activities in their area
- Donations of over 1.7 million parts for the 2016 Kit of Parts, making it more cost effective to provide a robust assembly to each team
- Promote involvement of our members with *FIRST* Robotics Competition teams and activities
- Invite teams to attend all ECIA events

ECIA and It's Members Support FRC®

ECIA member companies manufacture and sell electronic components. ECIA coordinates the donation of almost 2 million components to the Kit of Parts each year! For the vast majority of components, ECIA member companies donate at no cost to the competition.

The following companies support FIRST® programs in a number of ways. Visit their websites for information on the most current technologies and careers in the electronics industry!
