

FIRST® Robotics Competition

The hardest fun you'll ever have!

Combine the excitement of sports, science and technology, business management, marketing, and fundraising while competing with your teammates in a unique varsity Sport for the Mind™. In just six weeks with the guidance of adult Mentors, your team will design, build, program and test your robot to meet the season's challenge.

[See why!](#)

step 1 Form your team

You need:

- High-school-aged students
