2022-2023 FIRST® Tech Challenge

Field Supervisor
Sponsor Thank You

Thank you to our generous sponsor for your continued support of the FIRST® Tech Challenge!

Volunteer Thank You

Thank you for taking the time to volunteer for a FIRST® Tech Challenge event. FIRST® and FIRST® Tech Challenge rely heavily on volunteers to ensure events run smoothly and are a fun experience for teams and their families, which could not happen without people like you. With over 6,500 teams competing yearly, your dedication and commitment are essential to the success of each event and the FIRST Tech Challenge program. Thank you for your time and effort in supporting the mission of FIRST!

*Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It's what makes FIRST, first.”*
Introduction

What is FIRST® Tech Challenge?
FIRST® Tech Challenge is a student-centered program that focuses on giving students a unique and stimulating experience. Each year, teams engage in a new game where they design, build, test, and program autonomous and driver operated robots that must perform a series of tasks. Participants and alumni of FIRST programs gain access to education and career discovery opportunities, connections to exclusive scholarships and employers, and a place in the FIRST community for life. To learn more about FIRST® Tech Challenge and other FIRST® Programs, visit www.firstinspires.org.

Gracious Professionalism®

FIRST® uses this term to describe our programs’ intent.

Gracious Professionalism® is a way of doing things that encourages high-quality work, emphasizes the value of others, and respects individuals and the community.

Watch Dr. Woodie Flowers explain Gracious Professionalism in this short video.

Learn more about the roles of volunteers on our Volunteer Resources page, “Volunteer Role Descriptions”.

FIRST Privacy Policy

FIRST takes the privacy of our community seriously. As a nonprofit and a mission-driven youth-serving organization, we are compelled to understand who we are serving, how our programs are performing, and make improvements so that we can achieve our goals of making FIRST accessible to any youth who wants to be part of the fun, exciting and life-changing experience. Thus, we need to collect certain personal data from participants and volunteers to ensure we are meeting our goals and responsibilities as a youth-serving nonprofit organization.

As a volunteer, you may be asked to handle the personal data, or personally identifiable information (PII), of coaches, team members, and even other volunteers. It is critical that you understand and follow the FIRST Privacy Policy and complete any data protection and privacy training required by your role. If you have any questions regarding data protection and privacy, please reach out to the FIRST Data Governance Team at privacy@firstinspires.org.

Volunteer General Information

Volunteer Training and Certification

To Access BlueVolt and Complete a Volunteer Role Training Course:
Once you have applied for a volunteer role that requires certification a link will appear in your FIRST dashboard that will connect you to our learning management system BlueVolt.

1. Login to your FIRST Dashboard
2. On the grey menu below “Dashboard” Click on “Volunteer Registration"
3. Click on “Roles Missing Certification”
   a. Click into the link to “Review Outstanding Tasks” which will take you to the BlueVolt site where you can complete your certifications and sign up for new training

How to Access BlueVolt After Certifications are Complete:
Once you complete your certifications, you will no longer see a “Roles Missing Certification” link or a link to “Review outstanding Tasks” to get to BlueVolt. If that is the case, follow the steps below to access BlueVolt courses and updates.

1. Login to your FIRST Dashboard
2. At the top right of the page, click on the dropdown under your name and go to “My Profile”
3. Once there, on the left menu of the page, click on the “Certifications” link which will take you to the BlueVolt site where you can view/print your existing certifications and sign up for new training

If you have applied for a role but do not see the link to training in your dashboard, or you have other training related questions please email FTCTrainingSupport@firstinspires.org.

Volunteer Minimum Age Requirement
The minimum age requirement of a FIRST volunteer is 13 years old.

A minor must have a parent or guardian give written permission to volunteer. In addition, the FIRST Consent and Release Forms will need to be signed by a parent or guardian in the Volunteer Registration system for any volunteer under age 18.

Key Volunteer Role Minimum Age Requirement
Volunteers MUST be at least 21 years old before they can serve in a key volunteer role for the FIRST Tech Challenge. Key volunteer positions include: volunteer coordinator, head referee, judge advisor, field Supervisor, field technical advisor, lead robot inspector, lead field inspector, and lead scorekeeper. Local program delivery partners can make case by case exceptions to these guidelines by contacting FIRST for approval.

Bring a Friend!
Volunteers are a huge part of the FIRST Tech Challenge Program and continuing to inspire students to seek out careers in science, technology, engineering, and math (STEM). FIRST Tech Challenge needs your help in recruiting new volunteers to keep our programs thriving for future generations! If you have a friend or co-worker you think would be interested in volunteering at an event, there are just a few easy steps to help get them involved!

1. Check out our full list of volunteer opportunities online!
2. Have them apply for the Event in the Volunteer Registration System. Volunteers must be screened before volunteering.
3. Have them contact Firsttechchallenge@firstinspires.org with any questions they may have.

If they are concerned about jumping in head first, no worries! Job shadowing at a FIRST Tech Challenge Event is a great way to get a taste of what a full day’s worth of competition looks like. New volunteers can discover ways they can fit their personal skills into a volunteer position!

Helping Teams Succeed
A volunteers role is about helping a team succeed so they can compete. Teams spend countless hours, weeks and sometimes months working and reworking their robot design and strategies. After all this effort, some teams will still need a friendly volunteer to help create a positive event experience for the students.

Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
Job Description

Prerequisite for the Field Supervisor Role
To serve as a field supervisor, previous experience as a field technical advisor and/or referee is required.

Physical/Technical Requirements:

- Technical – Med
- Physical – Med (requires a lot of moving around)
- Administrative – High
- Communication – High

Time commitment:

The field supervisor should read this manual before the event. They should speak to the tournament director or program delivery partner to check for additional requirements, such as meetings before the event or run-throughs of the queuing path before the event. The estimated training time is one hour.

Additional 4-5 hours on top of the event day.

- Set-up (The field supervisor is generally the first one on the field and last to leave.)
- During event
- Tear-Down

Proper Dress:

- Wear comfortable shoes, most of the day will be spent standing and moving between the pit area and the competition fields.
- ANSI Z87.1 certified safety glasses are required in the competition area.

Overview of Responsibilities

The field supervisor is responsible for all activities in and around the robot playing fields, including:

- Competition playing field set-up and tear down.
- Keeping the robot matches on schedule.
- Ensuring the playing field is set up for each match.
- Repairing playing field game elements.
- Managing a safe environment, including:
  o Everyone is wearing safety glasses
  o No running
  o Robots are operating safely Cables remain taped down.
- The flow of activity in and around the robot playing fields. This includes referees, scorekeepers, field reset attendants, queues, teams, game announcers, etc.
- Insuring that volunteers have the resources they need and receive breaks.
The field supervisor is NOT responsible for:

- Interpreting game or robot rules.
- Refereeing or judging.
- Repairing robots.
- Explaining their actions, field technical advisor actions, referee decisions, game play, game rules, robot rules, etc., to coaches, mentors, parents, grandparents, etc.
- Helping teams with detailed robot debugging. This is a sure way to cause a tournament to run late.

The field supervisor and field technical advisor work together to keep the areas in and around the robot playing fields running smoothly. The field technical advisor concentrates on the technical issues (robots, field control system, scoring software, etc.) and the field supervisor is responsible for operational activities (team queuing, playing field reset, etc.). While some smaller events combine the field technical advisor and field supervisor responsibilities, having separate volunteers for each role will keep the workload manageable for each volunteer and is recommended by FIRST.

FIRST Tech Challenge events pack a lot of activity into one day. One of the keys to running a smooth and successful event is for teams and volunteers to show up to the event prepared. Teams spend countless hours preparing for competition day and we ask our volunteers to prepare for tournament day as well.

The field supervisor role is comparable to the conductor of a symphony orchestra. They are responsible for directing the flow of activities of groups of volunteers. Each group performs a specialized task in coordination with other groups, and one group’s misstep will disrupt the rhythm of the entire competition. The goal for the competition area volunteers is to stay within +/- one match of the published match schedule. If the matches run +/- two matches, it is time to look for ways to speed up or slow down matches so the tournament returns to a rhythm of +/- one match.

Anyone with good people and organization skills can serve as a field supervisor. However, a well-rounded field supervisor will have the following qualities:

- The field supervisor should be someone with high-energy. They will do a lot of walking around the competition area, conversing with teams and volunteers, and helping with event load-in and load-out.
- An experienced leader that can lead volunteers of all ages;
- An empathetic and patient person to work with still-maturing youth or a disgruntled mentor to explain an issue, and work with them to solve the problem during what can be an exasperating time; and
- A cheerleader for teams and fellow volunteers.

Pre-Event Day Responsibilities

Most FIRST Tech Challenge events are whole-day events. Field supervisors must help with field set up before the event and help tear down after the event. Plan on four to five hours of time commitment as well as the event daytime commitment.

Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
It is important before the event that the field supervisor reviews this manual. While field supervisors are key volunteers and are not required to pass a FIRST certification test to fill this role at an event, they must have certain knowledge and skills to be successful.

The field supervisor plays a key role in insuring that robot matches run smoothly and completing the tasks on the following checklist will help assure a fun and successful tournament day.

- Watch the game animation on the FIRST Tech Challenge Game & Season Materials page (http://firstinspires.org/resource-library/ftc/game-and-season-info). Focus on understanding what the teams are trying to accomplish during a match and the names of the playing field elements.

- Download the Game Manual Part 1 and read the “Tournament Day Outline”. It will be helpful to become familiar with the tournament terminology and structure. It would be useful to read up on the robot construction rules, and the Game Manual Part 2 to learn the game rules. Review the Field Assembly and Set-Up Guide to become familiar with the setup and breakdown of the field.

- Read this manual thoroughly.

- One or more weeks before event day, confirm the competition playing fields have been assembled and perform properly.

- The field supervisor should work with the tournament director to create a site plan for the competition area. Verify the tables, chairs, power extension cords, audiovisual equipment, etc. are reserved for event day.

Event Day Responsibilities

**Event Set-Up Day Checklist for the Field Supervisor**

Tournament set-up often occurs the day before the competition. Setting up the competition area and testing the electronics should take two to three hours for a single field tournament and three to four hours for a two-field tournament. The field supervisor is responsible for setting up the competition area as specified in the site plan, including:

- The playing field(s) – [Sample Layout](#)
- Scorekeeper’s table
- Queuing tables
- Crowd control stations (if applicable)
- Oversee the installation of the sound, video, and lighting systems

The field supervisor will work with the field technical advisor and a team of volunteers to set up and test the competition playing field(s) and the practice field(s). The playing field section of this manual contains information about playing field set-up, reset between matches, and repair.
Event Day Checklist for the Field Supervisor

- Arrive early; the field supervisor should be one of the first volunteers to arrive on event day.
- Assure the competition area is ready for volunteers and teams. Look for safety hazards, make sure cables are taped down, clean up trash, pick up tools that may have been left behind, etc.
- Check-in with the following volunteers:
  - **Field Technical Advisor** – Has everything been tested and are things ready for robot/field inspection and practice matches?
  - **Scorekeeper** – Has the scoring system been tested and have the teams, sponsors, etc. been entered?
  - **Audio Crew** – Has the sound system been tested? Has a sound check been performed with the microphones?
  - **Video Crew** – Has the video system been tested?

- Hold meetings with the competition area and pit queueing teams. This is a good time to test 2-way radios (if applicable) and review the day’s schedule, queuing procedure, queuing travel path between the pit area and the competition area, etc. Direct the queuers to bring the teams for the first 2 matches on each playing field to the competition area before the start of the opening ceremony. For a single field event, queuers bring teams for the first two matches. For a two-field event, queuers bring teams for the first four matches.
- Hold a meeting with the field reset crew and review their responsibilities, proper field set-up, robot match flow, etc.
- Get a copy of the match schedule with times from the scorekeeper. The schedule is created by the computer system but cannot be generated until the tournament director has determined all the teams have checked in for the competition and passed robot inspection.
- Attend the opening ceremony and be prepared to start the first match directly following.
- The rest of the day will be spent overseeing the activities around the competition playing field(s).

Field Supervisor Event Primary Activities
The field supervisor is a manager and observer of the entire competition area to assure the flow of activity is going well. The field supervisor does not perform the detailed actions of any of the volunteer roles that they supervise. They need to ensure that referee deliberations, while important, are also brief, and that game announcers keep the matches moving along at an appropriate pace.

Primary activities of the field supervisor include:
- Ensure the flow of the competition stays on the schedule for the competition.
  - Referees are working quickly and efficiently;
  - Field resetters quickly reset the field;
  - Game announcers and emcees keep the event moving forward; and
  - Queuers deliver teams to the field on time.
- Check in with volunteers to make sure they take breaks and are hydrated.
- Verify the environment is kept clean and safe.
- Contribute to the sense of fun for the event.

Gracious Professionalism® - "Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first."
The Playing Field

The field supervisor is responsible for verifying the playing fields are built to specification, correctly set up, repaired when needed, and disassembled at the end of the competition. They should bring a tabbed binder or tablet containing the following documents to the competition:

- Game Manual Parts 1 and 2
- Field Supervisor Manual
- Field Technical Advisor Manual
- Scorekeeper Manual
- FIRST Tech Challenge Legal and Illegal Parts List
- Game Q & A Forum Printout (latest version)

These guides and manuals are updated throughout the season. Make sure to have the latest versions of these documents on hand. A revision history page at the beginning of each document is the key to keeping track of updates. These documents are in the Resource Library on the FIRST website: [http://www.firstinspires.org/resource-library/ftc/volunteer-resources](http://www.firstinspires.org/resource-library/ftc/volunteer-resources).

The Game Q&A Forum is an online community where teams ask the FIRST Tech Challenge Game Design Committee questions about the game. Once events start, the forum is updated **Sunday through Thursday at 12:00 p.m. Eastern Time**. Game Design Committee posts to this forum are enforceable rules or guidance that carry the same weight as the information contained in the guides and manuals. The field supervisor should download a printout of the forum on the Thursday before the competition. FIRST posts a PDF format copy of the Q&A Forum ([http://firstinspires.org/node/5291](http://firstinspires.org/node/5291)) Thursday afternoon.

**Field Set-Up**

Playing field construction should start before the first event of the season. The field supervisor is responsible for verifying that the playing fields are set up properly. Initial playing field verification should be done one week or more prior to competition day. Set up the playing fields the day before the competition. Set-up should take approximately one hour per field depending on the complexity of the game elements; this time will get shorter with experience.

**Field Repair**

Tools, spare parts, and repair materials should be on-hand should the playing field or field elements become damaged. Spare parts are game-dependent and will vary from year to year. A field supervisor’s tool kit should generally contain:

- Flashlight
- Tape measure
- Multi-meter
- Hex key set (English)
- Adjustable wrench
- Phillips screwdriver
- Slotted screwdriver
- Pliers
- Diagonal cutting pliers
- Utility knife
- Gaffer’s tape
- Duct tape
- Cable ties (zip ties) – various
- Assortment of fasteners
- Cordless drill
- All-purpose drill bit set
- Drill bits for Field assembly
  - 5/32 hex
  - Phillips and slotted
- Safety glasses or side shields for prescription glasses
- Rubber bands
- Scissors
**Field Reset**

Field reset starts when referees finish scoring a match and ends when teams, robots, referees, etc. are on station for the next match. Efficient flow of action during field reset is critical to keeping the competition running on schedule. The field supervisor should pay close attention to the following:

- Teams quickly remove their robots from the playing field area after the referees have given the teams a clear the field signal.
- Field reset volunteers restore the playing field to its starting condition.
- On-deck teams quickly set-up their robots on the playing field after reset is complete.
- The head referee verifies the playing field is in the correct starting configuration.
- The field technical advisor and/or his designee perform a quick visual check of the robots to assure they are good to go.
- The game announcer, referees, and field technical advisor should be on station and ready to start the match.

**Transition from Autonomous to Driver Controlled Period**

Since the 2017-2018 season, there is no longer a hard stop following the autonomous period to transition to the driver-controlled period of the match. Once the autonomous portion of the match ends, the scoring system will tell the teams to pick up their driver station. As a visual cue, the scoring system will display to teams that they must pick up their driver station. Teams will only have 5 seconds to pick up their driver station, so they should make sure to pay close attention! After the 5 seconds, there will be a 3-2-1 countdown (both visual and audio through the scoring system) and the driver-controlled period of the match will begin right away.

**Post-Event Day Responsibilities**

At the end of the day, walk away from the event knowing you have done your best to ensure the competition ran smoothly. This is the goal of the field supervisor position. If there are any thoughts on how to improve the flow for the next event, take notes and share with the tournament director.
