# FIRSTTech Challenge Event Management -Pit Map Creation

**FIRST.** TECH CHALLENGE

#### **Pit Map Feature**

#### Introduction

- Pit maps are recommended for all events so that the attendees can locate team pits or visit other team pits.
- Judges can use this map to locate teams for the pit interviews, as well.
- The pit map feature helps organize your event space layout; this feature is especially helpful for large events with 20+ teams.
- The pit map feature can be found on the "Event Dashboard" of a specific event in both FTC Scoring and FTC Live.

FIRST

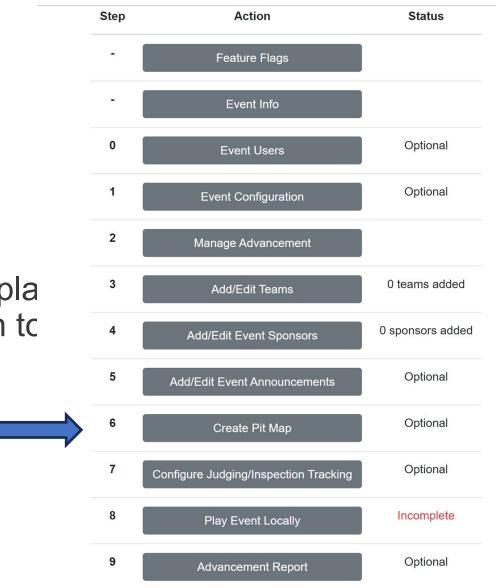

**ALLENGE** 

#### **Event Dashboard**

- The "Pit Map" feature appears on the specific event dashboard.
- Keep in mind this feature is an optional enhancement. This tool can help event planners visualize the event layout/floor pla by adding team pits, fields, and pit admin to your layout design.

### Pit Map Editor Icons

• There are five "Cursor" icons:

# Pit Map Editor Icons

- There are seven "Cell Type" options:
  - "Open": a large cell space. Use for the entire floor space, pit admin.
  - "Boundary": black cell space. Use before "Open" to create an outline of a different area.
  - "Pit": Best used in 2x2 grid boxes for numbered rows of pits.
  - "Field"
  - "Field (rotated)"
  - "Object"
  - "Label": Text

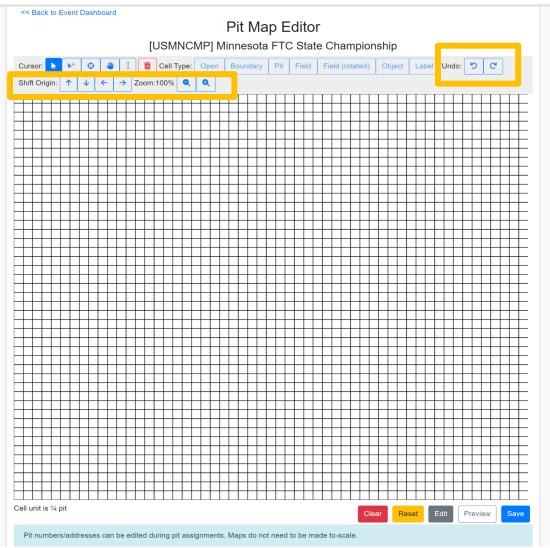

Pit numbers/addresses can be edited during pit assignments. Maps do not need to be made to-scale.

### Pit Map Editor - Navigation

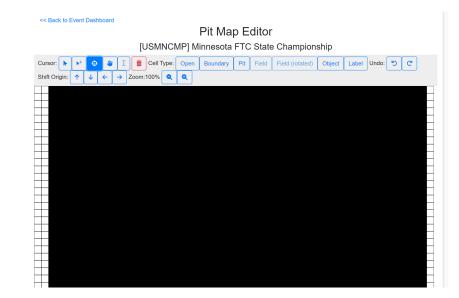

- There are multiple navigation options:
  - "Undo" and "Redo"
  - "Shift Origin" will allow you to move a cell or grouped cells North, East, South and West.
  - "Zoom" In and Out options.

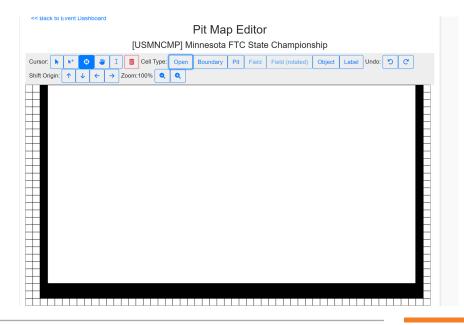

#### Pit Map – Creating a Cell Type

- Start by selecting "Fill Area" icon to create a cell type (pit, field, etc.).
- In this example, we will build an entire pit area by first creating a "boundary", followed by an "open" cell to build the overall floor plan layout.

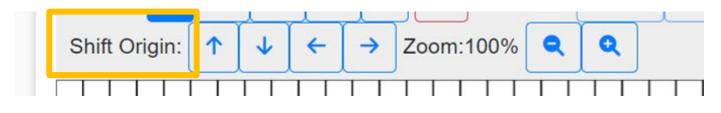

- Use "Shift Origin" buttons to move the entire diagram.
- Use "Undo" buttons to go back to the last action.

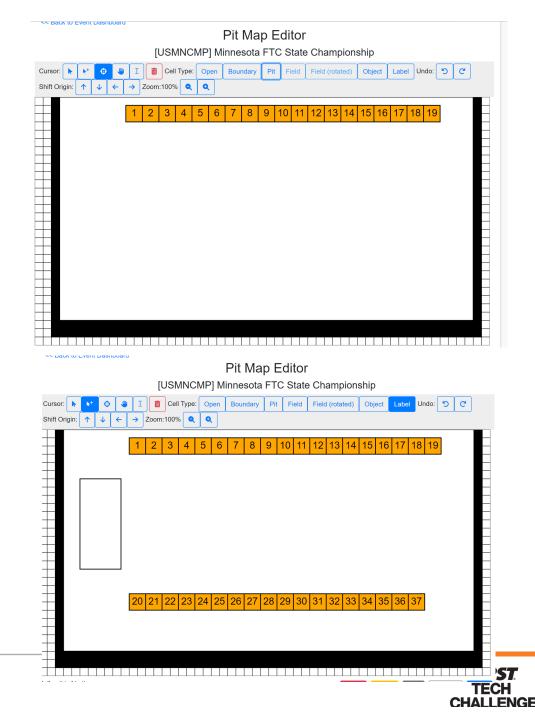

8

## Create the Pits

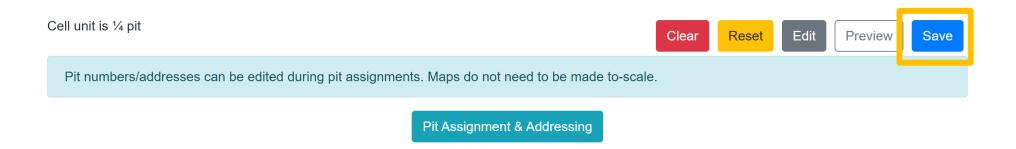

- Select the cursor "Fill Area" (compass) draw your pit area, then select the "Pit" cell type to populate the space with numbered pits.
- Note that another group of pits will start at the next consecutive number.
- Use the "Object" cell type to create a pit admin space or other spaces.
- Select a pit and the "Move" hand icon to move a pit.

#### Save the Pit Map

- Scroll to the bottom of the grid to "Save".
- You can also "Clear", "Reset", "Edit", and "Preview".

#### Assign Teams to the Pits

Step One

- Scroll to the bottom of the grid to select the "Pit Assignment and Addressing".
- Note: You need to "Add/Edit" teams in the "Event Dashboard" prior to this step.

Cell unit is ¼ pit		Clear	Reset	Edit	Preview	Save
Pit numbers/addresses can be edited during pit assignmer	scale.					
	Pit Assignment & Addressing					

## Assign Teams to the Pits

Step Two

- Choose the "Pit Label" (Number, Address, Team) then "Autoassign Pits".
- Select the option that works best for your pit assignments.
- We hope you enjoy this new optional feature.
