Emcee	Design Award The Design Award expands on this year's challenge, inspiring teams to incorporate industrial design into their robots. These elements can be shown in the simplicity of the design as it applies to the tasks, the look and feel of the robot in how the design allows us to think of robots in new ways. The design aspect must serve a function – but they	

	should also differentiate the robot in a unique fashion.

Emcee	<p>Collins Aerospace Innovate Award (Do not alter script)</p> <p>The Collins Aerospace Innovate Award celebrates a team that has the ingenuity and inventiveness to make their designs come to life. This award is given to the team that the Judges feel has the most innovative and creative robot design solution to the <i>FIRST</i> Tech Challenge game. Elements of this award include elegant design, robustness and 'out of the box' thinking with regard to design.</p> <p>This award may address the design of the whole robot or some sub- assembly component of the robot. The creative component needs to work consistently, but a robot does not have to work all of the time during matches to be considered for this award. The team's engineering notebook showed the design of the component(s) and the team's robot, and clearly explains how the team arrived at their solution.</p>
