2021-2022 FIRST® Tech Challenge

Scorekeeper Guide
**Sponsor Thank You**

Thank you to our generous sponsors for your continued support of the FIRST® Tech Challenge!

![Sponsor Logos]

**Volunteer Thank You**

Thank you for taking the time to volunteer for a FIRST® Tech Challenge event. FIRST® and FIRST® Tech Challenge rely heavily on volunteers to ensure events run smoothly and are a fun experience for teams and their families, which could not happen without people like you. With over 6,500 teams competing yearly, your dedication and commitment are essential to the success of each event and the FIRST Tech Challenge program. Thank you for your time and effort in supporting the mission of FIRST!

11. Match Control and Scoring

11.1. Examples of Scoring Workflows
- Scoring Using Paper Scoresheets
- Scoring Using Wireless Tablets

11.2. Match Control Page
- Match Control Buttons
- Match Control Tabs
- How to Display Sponsor Information
- How to Display the Audience Key

11.3. Scoring/Timing Displays
- Setting up a Display
- Configuring the Event for Paper Scoring
- Step-by-Step Example: Scoring using Paper sheets

11.4. Scoring Using Paper Scoresheets
- On the Match Control Page, under the “Settings” tab, deselect the “Use Live Scoring” checkbox. This will simplify the match flow for paper scoring and will automatically set the displays to not show live scores.
- Configuring the Audience Display
- Step-by-Step Example: Scoring with Paper sheets

11.5. Live Score Tracking Using a Tablet
- Connecting a Tablet to the Server
- Step-by-Step Example: Scoring an Event with Wireless Tablets

12. Managing Elimination Matches

13. Managing League Events (Regions with Leagues)

11.5. Inter-League Model

11.6. League Configurations
- Standalone League Model
- Inter-League Model

Example Scenario: 87

Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
Introduction

What is FIRST® Tech Challenge?
FIRST® Tech Challenge is a student-centered program that focuses on giving students a unique and stimulating experience. Each year, teams engage in a new game where they design, build, test, and program autonomous and driver operated robots that must perform a series of tasks. To learn more about FIRST® Tech Challenge and other FIRST® Programs, visit www.firstinspires.org.

Gracious Professionalism®

FIRST® uses this term to describe our programs’ intent.

Gracious Professionalism® is a way of doing things that encourages high-quality work, emphasizes the value of others, and respects individuals and the community.

Watch Dr. Woodie Flowers explain Gracious Professionalism in this short video.

Learn more about the roles of volunteers on our Volunteer Resources page, “Volunteer Role Description”.

FIRST Privacy Policy

FIRST takes the privacy of our community seriously. As a nonprofit and a mission-driven youth-serving organization, we are compelled to understand who we are serving, how our programs are performing, and make improvements so that we can achieve our goals of making FIRST accessible to any youth who wants to be part of the fun, exciting and life-changing experience. Thus, we need to collect certain personal data from participants and volunteers to ensure we are meeting our goals and responsibilities as a youth-serving nonprofit organization.

As a volunteer, you may be asked to handle the personal data, or personally identifiable information (PII), of coaches, team members, and even other volunteers. It is critical that you understand and follow the FIRST Privacy Policy and complete any data protection and privacy training required by your role. If you have any questions regarding data protection and privacy, please reach out to the FIRST Data Governance Team at privacy@firstinspires.org.
1. **FIRST Volunteer Rights and Responsibilities**

**NOTICE OF NON-DISCRIMINATION**
For Inspiration and Recognition of Science and Technology (FIRST®) does not discriminate based on race, color, national origin, sex, disability, age, status as a veteran who served in the military, religion, gender, gender identity, or gender expression in its programs and activities.

Keep updated at: [http://www.firstinspires.org/about/legal-notices](http://www.firstinspires.org/about/legal-notices)

2. **Job Description**

- **Physical/Technical Requirements:**
  - Technical – High
  - Physical – Low
  - Administrative – High
  - Communication – High

- **Time commitment:**
  - The Scorekeeper should expect to arrive early at the event to help set up the scoring software and displays.
  - The Scorekeeper should expect to be at the event for the entire duration, approximately 8 hours for a full-day event. League Meet events are typically shorter.

- **Proper Dress:**
  - The Scorekeeper generally sits. FTC Live Comfortable shoes and attire are encouraged.
  - ANSI Z87.1 certified safety glasses are required in the competition area.

2.1. **Volunteer Training and Certification**

Volunteers must apply to their role using the Volunteer Registration System. After the volunteer has applied to their role, FIRST Tech Challenge will send an email to the volunteer with access instructions to training and certifications (if applicable). Emails with access to the training and certifications will be sent within one business day from applying to the role. If you have applied for a role but have not received access to the training, please email FTCTrainingSupport@firstinspires.org.

The Scorekeeper should read this manual before the event. She/he should speak to the Tournament Director or Program Delivery Partner (PDP) to check for additional requirements, such as meetings before the event or run-throughs of the queuing path before the event.

The Scorekeeper is required to pass the certification test prior to the event. The estimated training time is one hour.

The Scorekeeper should familiarize him or herself with the FIRST Tech Challenge Scoring Software prior to the event.

2.2. **Volunteer Minimum Age Requirement**

FIRST requires that FIRST Event volunteers be at least 13 years old, however, the Regional Planning Committee can increase the age requirement as needed. Adult volunteers cannot have children with them.
while volunteering nor be responsible for supervising children at the event. Children under the minimum age are welcome at FIRST Competitions with suitable supervision by someone other than a volunteer.

2.3. **Key Volunteer Role Minimum Age Requirement**

Volunteers MUST be at least 21 years old before they can serve in a Key Volunteer Role for the FIRST Tech Challenge. Key Volunteer positions include: Volunteer Coordinator, Head Referee, Judge Advisor, Field Manager, Field Technical Advisor, Lead Robot Inspector, Lead Field Inspector, and Lead Scorekeeper. Local Affiliate Partners can make case by case exceptions to these guidelines by contacting FIRST for approval.

2.4. **Bring a Friend!**

Volunteers are a huge part of the FIRST Tech Challenge Program and continuing to inspire students to seek out careers in science, technology, engineering, and math (STEM). FIRST Tech Challenge needs your help in recruiting new volunteers to keep our programs thriving for future generations! If you have a friend or co-worker you think would be interested in volunteering at an event, there are just a few easy steps to help get them involved!

1. Check out our full list of volunteer opportunities online!
2. Have them apply for the event in the Volunteer Registration System. Volunteers must be screened before volunteering.
3. Have them contact FTCteams@firstinspires.org with any questions they may have.

If they are concerned about jumping in head first, no worries! Job shadowing at a FIRST Tech Challenge event is a great way to get a taste of what a full day’s worth of competition looks like. New volunteers can discover ways they can fit their personal skills into a volunteer position!

### 3. Intro to Scorekeeping - Overview of Responsibilities

This guide provides a scorekeeper guidance on the responsibilities and overview of the scoring systems used in FTC. The main focus is on traditional and hybrid events that use the downloadable FTC Live software and all of its features and workflows. The FIRST Tech Challenge lead scorekeeper (referred to in this manual as “the scorekeeper”) is the person responsible for making sure that the scoring software is set up correctly for use at a traditional or hybrid event. The scorekeeper helps the flow of the event and provides information to the teams and to the audience. Being prepared before and diligent during the event will help to provide a positive experience for all participants. The responsibilities of a scorekeeper include:

- Participation in training prior to the event.
- Accurately entering match scores into the FIRST Tech Challenge Live (FTC Live).
- Entering team and sponsor information into the scoring software.
- Generating matches for the event.
- Setting up displays for audience to view scores.
- Communicating match schedules to key volunteers such as Referees, Judges, Tournament Directors, etc.

Make sure to speak with the Program Delivery Partner or Tournament Director prior to the event to determine if there are additional responsibilities and time commitments to set up the scoring computers and displays. At some events, the scorekeeper may be responsible for setting up the computers, displays, etc. There are many components that are required to be set up to run the FTC Live and displays correctly.
A scorekeeper must be confident and comfortable with the system to be able to reliably record results during the hectic pace of a FIRST Tech Challenge event. Learning the role and equipment ahead of time will go a long way towards keeping the event running smoothly and on time.

### 4. Pre-Event Day Responsibilities

Outlined below are responsibilities scorekeepers have before event day. Make sure to check with the tournament director to see if they need help setting up before the event, and when you should be there to set up the scoring equipment. Many events set up the fields and A/V equipment the night before, which may also include loading the most current version of FTC Live onto the scoring computer, configuring the event with FIRST Tech Challenge Scoring system (FTC Scoring), and setup of the display screen. Be sure to check with the tournament director or PDP to understand what is being prepared ahead of time, and what needs to be done on the morning of the event. Reading the section Setting Up a Traditional Event will also prepare you for pre-event responsibilities for the 2021-2022 season.

- Make sure to update to the most up-to-date version of FTC Live.
- Contact the PDP or event admin to transfer the configured event in FTC Scoring to the downloaded FTC Live scoring system. Scorekeepers can also be given the role of event configuration in the FTC Scoring system by the PDP.
- Watch the pre-recorded Scorekeeper training videos. This will help familiarize with the system and how it operates.
- Passing the scorekeeper certification test in the BlueVolt is required.
- Familiarize yourself with the scoring software FTC Scoring, and FTC Live (traditional and hybrid events)
- (Optional) Attend a Monthly Key Role Discussion Q&A call. This will provide the opportunity to ask questions, or provide feedback to other scorekeepers. If you cannot join a call, the recordings are stored in the learning management system.

### 5. Event Day Responsibilities

#### 5.1. FIRST Tech Challenge Live Setup

Setup of FTC Live is usually completed the day before the event. The Program Delivery Partner (PDP) or tournament director will be able to guide you on what has been completed the day before. The transfer of the event data that has been configured in the cloud-based FTC Scoring system to FTC Live should occur no more than three days prior to the event. On the morning of the event, you will need to turn on the scoring computer and displays, and open the FTC Live software.

#### 5.2. Pre-Match Responsibilities

- Work with PDP or tournament director to establish when teams are declared “no show”.
- Work with PDP or tournament director to determine logistics of the event, such as number of matches to be played, or the time schedule for the matches.
- Ensure that all team and sponsor information has been entered correctly.
5.3. Game Play
The scorekeeper and the emcee/game announcer or head referee should agree on a “ready” signal to start the match timer clock prior to the start of the matches. The match timer clock shall begin after the emcee/game announcer has verified that both alliances and the scorekeeper are ready, and a 3-2-1 countdown.

5.4. Generate Alliances
After all qualification matches have been played, the scorekeeper will enter the formed alliances during alliance selection and generate matches for the elimination matches.

5.5. Awards
The scorekeeper may be asked to enter the awards into FTC Live and print the awards ceremony script for the emcee/game announcer.

Other event-day duties may be assigned, as needed.

6. Post-Event Responsibilities

Qualifying Tournaments, League Meets, League Tournament, State/Region Championship Events – After all matches have been played and all scores have been recorded, the event score results must be submitted to FIRST. See the section Uploading Event Data to FIRST for more information.

7. Introduction to the FIRST Tech Challenge Scoring System and FIRST Tech Challenge Live software

What is the FIRST Tech Challenge Scoring System?
The FTC Scoring system is a cloud-based software that has multiple functions to allow you to input and track vital information during a remote, hybrid or traditional event.

The system allows a PDP/event admin or a team administrator to generate and track the following for a remote event:

- Team information
- Sponsor information
- Match results

For a traditional event, FTC Scoring system is used for:

- Event creation

Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
• Event configuration:
  o League creation and setup
  o Team lists
  o Division creation and setup
  o Adding sponsor information

What is the FIRST Tech Challenge Live software
FIRST Tech Challenge Live is a downloadable software program that has multiple functions to allow you to input and track vital information during a traditional event only. It works in coordination with the setup of events in the FTC Scoring system prior to an event.

The system allows a scorekeeper to generate and track the following for a traditional event:

• Team information
• Sponsor information
• Match schedules
• Inspection schedules
• Judging schedule
• Match results (including an option for real-time score tracking)
• Alliance selection for elimination and final matches.

This software will also allow you to display sponsor information and team match results to teams and spectators. This manual will go through step-by-step instructions on how to run the program correctly and efficiently.

8. System Hardware

8.1. System Requirements
The FIRST Tech Challenge Live software is available on the Windows and Mac platforms. It is a browser-based application, meaning that you interact with the system exclusively through a web browser. The system also supports real-time score tracking. Live score data can be entered into the system using a tablet.

Windows
• Windows 7 or 10
• Java 8 or higher (available from www.java.com, only needed for the laptop running system software)
• Google Chrome version 80 and higher; Firefox is not supported.
• Support for Wi-Fi if connecting to a wireless network
• Ethernet adapter if connecting to a wired network

Mac
• macOS Sierra or greater
• Java 8 SDK or higher (available from www.java.com, only needed for the laptop running system software)
  o Note – Unlike the Windows environment, macOS requires the Java Development Kit (JDK) to run. Windows only requires the Java Runtime Environment (JRE) to run.
  o If you install the JDK software onto your Mac, you should not need to install the JRE software. The JRE should already be included as part of the JDK
  o The JDK software can be downloaded from the following Oracle web link:
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

Figure 1 - Accept the License Agreement, then select the Mac OS X x64 version to download.

- Google Chrome 80 and higher
- Support for Wi-Fi if connecting to a wireless network
- Ethernet adapter if connecting to a wired network

**Android Tablet (for Real-time Score Tracking)**
- Android Marshmallow (6.x) or greater
- Google Chrome 80 and higher
- Support for Wi-Fi

**Note:** Some event hosts prefer to use Amazon Kindle tablets for real-time score tracking. Kindle tablets can be configured to work well with the FTC Live. Kindle tablets, however, do not typically have Google's Chrome Browser installed. Additional steps are required to get the Chrome software running properly on a Kindle tablet. Details on installing Chrome on a Kindle tablet are beyond the scope of this documentation.

**Also note:** that some Kindle tablets have an operating system that is based on an older version of Android (Lollipop). These Kindle devices can still be used with the FTC Live.

**iOS Tablet (for Real-time Score Tracking)**
- iOS 8 or greater
- Google Chrome Support for Wi-Fi

**8.2. System Layout**
The FIRST Tech Challenge Live software is flexible and can be used in a variety of configurations. This section provides an example of a basic configuration and an example of a more complex configuration. These
configurations are supported by FTC tech support during events. There are other configurations that will not be supported due to too many variables, such as cellular data and school networks. Please work with your venue IT and FTA to determine which setup is best suited to your events.

**Basic Configuration with Paper Scoring**
The most basic configuration requires a single laptop that will serve as both the scorekeeper computer and as the field display computer. This configuration also includes an external monitor (to serve as a field side display), and a printer (to print match schedules and scoresheets).

![Figure 2 - A very basic layout with paper scoring.](image)

**Advanced Configuration with Real-Time Scoring**
The system also supports real-time score tracking using a pair of wireless tablets.

![Figure 3 – An advanced configuration with support for real-time tracking.](image)
This advanced configuration includes the following components:

- Scorekeeper Laptop – A laptop that has the FTC Live scorekeeping software installed. This laptop acts as a server for the whole system. It is also used for match control and scorekeeping (such as reviewing, editing, and committing scores).
- Printer – Used to print match, judging and inspection schedules, reports, and other useful documents.
- Network Router with Wi-Fi support – Used to connect system components together.
- Field Display Laptop – A laptop that uses a web browser and a network connection (wired or wireless) to access the system server and display field-related information during an event. It is connected to a large screen monitor.
- Audience Display Laptop - A laptop that uses a web browser and a network connection (wired or wireless) to access the system server and display spectator-specific information during an event. It is connected to a large screen monitor.
- Scoring Referee Tablets (x2) – Referees use these tablets to track, in real time, the score during a match. After a match is complete, referees can review, edit and submit their scores to the system. The tablets use a wireless connection and a web browser to access the system server.

Important Tips:

- You will need to know the IP address of your computer that is running the system software (i.e., the scorekeeper laptop in this example). When another device, such as a referee tablet or a display computer, wants to access the system, the user will have to provide the IP address of the scorekeeper laptop to the web browser in order to access the system functions. The server IP is shown in the header bar of every page of FTC Live. If the displayed IP does not work, consult with your IT administrator on what the IP address is for your server.
- Wireless activity for FTC Live should operate on a Wi-Fi channel that will not interfere with the control of the competition robots.
- Audio cues (such as the match start or match stop sound effects) for a public announcement (PA) system can be pulled from any of the Display computers. It is recommended that a single computer is used as the source of the PA audio (to avoid audio synchronization issues).

Best Practices:

- Use a dedicated, standalone router.
- All displays and tablets should be on router’s local LAN.
- If supported use a 5Ghz Wi-Fi channel.
- Disable any firewall on the computer that will be running the server.
- Optional scorekeeping internet access should be bridged via second ethernet adapter (usb wifi dongle).
- If doing so, ensure that scorekeeping server is picking up the right adapter’s IP address.

Other Configurations NOT Supported by FTC Tech Support

School Network

- May not always work.
- School networks often have aggressive internal firewalls.
- School networks often block traffic entirely from unknown devices.
- Organizers must work with school IT staff to set up and test the network prior to the day of the event.
- Day of event setup in an unfamiliar school very often results in failure and calls to the FIRST support line.
- FIRST cannot provide day of event network or setup support for setups that use a school network.
Cellular Hotspots

- Reports that this has worked for some people.
- FIRST does not test this configuration.
- Hundreds of different phones across dozens of different Android or iOS versions make it impossible for FIRST to provide support.
- FIRST cannot provide day of event network or setup support for setups that use a cellular hotspot.
9. Download and Installation

9.1. Important Tips for Running the System Software

Here are some tips before you get started:

- Disable any firewall, or open appropriate ports, on the computer that will be running the server.
- Disable any ad blocking software on devices that will interface with the server. The ad blocking software occasionally misinterprets server resources as ads.
- Ensure that Google Chrome is installed and is the preferred browser.
- Important note: Firefox browser is not supported!
- If it has been more than a few days since the software was released and you have internet access, perform a data download before creating the event to ensure team info is up to date. "Event Admin" dropdown -> Manage Server -> Data Download.

9.2. Minimum Hardware Configuration

For most events, the hardware requirements to run the FTC Live scoring software are very modest.

**Scoring Server Minimum Requirements (Windows/Mac/Linux)**

- Intel Core i5 Processor
- 4 GB of RAM
- 300 MB of available disk space
- CAT 5 Ethernet adapter (USB connected would be OK if built-in not available)
- 802.11 WiFi adapter

**Note:** If you are running a large event, such as a dual division event, a higher performing computer might be warranted.

**Network Requirements**

The selection and configuration of the network hardware can be more critical than the selection of the server hardware to the success of your live scoring event.

- Use a dedicated (i.e., not shared with other users or applications), local network to connect your scoring devices.
- To avoid latency issues, the scoring server should be local to your event (and not run through a remote Internet/Cloud connection).
- Scoring network should be on its own secure network (i.e., not open to the public). This should minimize the risk of malicious activity from occurring towards the FTC Live.
- Use a wired connection whenever possible (with the exception of the real-time scoring referee tablets, which are typically wireless devices).
- If you need to use a wireless connection, work with your FTA and venue IT staff to make sure you select a wireless channel that does not interfere with the competition robots.
- Check with your venue’s IT staff to see if a WiFi Blocker is present. If one is present, you will not be able to use wireless scoretracking devices unless the staff disables this function.
- Use a modern (made within the past 5 years) switch/access point that is powerful enough to accommodate the number of devices needed at your event:
  - **FIRST** has received credible reports of older, “underpowered” switch/access points being unable to support a large enough number of devices operating on the FTC Live network.
  - Use an appropriately sized network device that will be able to accommodate all your scoring-related devices simultaneously.

*Gracious Professionalism®* - “Doing your best work while treating others with respect and kindness - It’s what makes **FIRST**, first.”
9.3. Downloading the Software Package

The FIRST Tech Challenge Live software is available for download from the following link:

https://github.com/FIRST-Tech-Challenge/scorekeeper/releases

The software is stored as a compressed archive file and is available in .zip format.

To use the software, unzip the downloaded file into the folder of your choice. FIRST suggests that users save the file on the computer’s desktop to easily access the program. The software will run from this directory.

To extract or unzip the file, right-mouse select the archive file and select the appropriate option to extract the compressed files to your computer.

Important Note: Keep the version up-to-date for the latest feature updates and bug fixes. Delete previous versions from your Desktop to enable use of the most recent version.

9.4. Launching the FIRST Tech Challenge Live Server

Once you have successfully extracted the contents of the archive file, you will need to launch the system server. This server will run in a window on your computer. You will access this server through your Chrome web browser.

Launching the Server Using Windows

Use Windows Explorer to navigate to the main program directory. Find the Windows batch file called “FIRST-Tech-Challenge-Live-Windows.bat” and double-select it to launch the server.
Figure 5 – Double-select the FIRST-Tech-Challenge-Live-Windows.bat batch file to launch server.

It is safe to ignore the warning and select “Run” to run the software.

Figure 6 - Windows 7 users might see a warning message similar to this one.

Note: If you are a Windows 10 user you might need to select the “More info” link on the warning message and then the “Run anyway” button to run the software.

Figure 7 - Select “More info” then “Run anyway” to run the software.

A black terminal window will pop open and will need to remain open while you are using the software. This is the window in which the system server is running.

Figure 8 - The batch file will launch the system server in a terminal window.

After the server is started, the batch file will launch your default web browser and display the main webpage (web address of “localhost”).
Launching the Server Using macOS
Using Finder, navigate to the main directory of the program folder and locate the script file named “FIRST-Tech-Challenge-Live-UNIX”. Double-select the file to run the script.

Note: macOS might warn you that the application was downloaded from the Internet. If you see this warning, select the “Open” button to allow your computer to run this application.

For Mac computers, the user account that is running the scorekeeping software typically needs administrative access on the computer to run the software properly. When you launch the “FIRST-Tech-Challenge-Live-UNIX” script, the software will check to see if you are running the script with administrative access. If it does not think it has administrative access, the application will prompt you for your Mac's password. A macOS terminal will appear and the system will prompt you to login using your user password. Type in the password and press return.
If successful, the terminal window will show that the scorekeeping server is running. Note that while you are using the software, you should keep the server running in the background on your Mac computer. You can minimize the terminal window, but do not close the window or the system will stop working. After the server is started, the batch file should also launch your default web browser and display the main system webpage (with a web address of “localhost”, see Figure 11).

**Note:** On some Macs, the system will launch the main page in a Safari browser, even though you might have Chrome set as your account’s default browser. If this happens, FIRST recommends closing the Safari window and open a Chrome window instead. Specify the address of “localhost” in the Chrome window to access the scorekeeping server.

9.5. Using an Alternate HTTP Port (Advanced Topic)

By default, when you launch the server, the software tries to use the default HTTP port (port 80) when it launches the web server that is used by the scoring software. In some cases, the default port might not be available on the laptop that is running the system’s server.

Or, if a Mac user does not have administrative privileges on the computer (which is needed to use the default port), then he or she can still run the software if they specify an alternate HTTP port for the scorekeeper server.
For these cases, it is possible to change the port by passing the new port value as a command line argument. Note that this is an advanced topic. Most scorekeepers will not need to know how to change the port.

**Using an Alternate HTTP Port on a Windows Computer**

Open a Windows command line terminal ("cmd.exe") and navigate to the "bin" subdirectory of the scorekeeping software’s program folder. In the Command window, type in the following command:

```
FIRST-Tech-Challenge-Live.bat -p <port number>
```

Where `<port number>` is replaced by the value of the port number you’d like to use ("8080" for example). Press RETURN and the software should invoke the webserver and use the port specified in the command line.

![Command Window](image)

*Figure 13 - Include the argument "-p 8080" to launch the server on port 8080.*

When the install script launches your web browser it should include the port number (in this example, ":8080") when opening the web page for the address “localhost”.

![Web Browser](image)

*Figure 14 – If you changed the port number, then you must include the new value in the address when accessing the server.*
Using an Alternate HTTP Port on a Mac Computer

One advantage of using an alternate HTTP port number on a Mac is that it does not require administrative access to run the software. This is useful if your user account is restricted and does not have administrative privileges.

You will need to use a terminal window to launch the software using a different HTTP port. The terminal program is in the “Utilities” subfolder of the macOS “Applications” folder.

Launch the terminal app from the Utilities folder. You will need to type commands into the terminal window to navigate to the FIRST Tech Challenge Live directory and then to launch the server software. Note that macOS is a case sensitive operating system so if you copy the commands in the example below, make sure the capitalization is correct.

For example, assume that the software is in a folder on the Desktop of the current user and has the name “FIRST-Tech-Challenge-Live-0.4.0”.

You will need to type in the following command at the terminal prompt to change to the “bin” subdirectory.

```
cd ~/Desktop/FIRST-Tech-Challenge-Live-0.4.0/bin/
```

If you successfully changed to this “bin” subdirectory, you can invoke the software using the following command (don’t forget the “./” before the name of the file):

```
./FIRST-Tech-Challenge-Live -p <port number>
```

Where <port number> is replaced by the desired port number value (for example, “8080”). The software should invoke the system server and use the port specified in the command line. When the install script launches your web browser it should include the port number (in this example, “:8080”) when opening the web page for the address “localhost” (see Figure 16).

Navigating to the Server Using an Alternate Port

If you launched the server with an alternate HTTP port, then when you want to connect to the FTC Live server, you must specify the port number as part of the server address. For example, if the system is listening on port 8080, then you must append a “:8080” to your web address when navigating to the server. If you do not specify the port at the end of the address, the web browser might fail to connect to the scorekeeping server.
10. Setting Up a Traditional Event

10.1. IMPORTANT Season Changes - Setting Up an Event

Setting up a traditional event has a different workflow starting in 2020-2021. Most event setup MUST be done in the cloud-based FTC Scoring system before the event, and some setup can be made easier if done ahead of time.

**Event Creation:** All events are synchronized within the cloud-based FTC Scoring system ([FIRST Tech Challenge Scoring](https://ftc-scoring.firstinspires.org)) automatically within a day of entry into FIRST’s event creation portal. All official events must be created this way. Official events are imported into FTC Live from FTC Scoring system at the start of an event. Official events are uploaded from FTC Live upon completion of the event through the “Send Results to FIRST” page.

**Event Configuration:** Several parts of event setup MUST be done ahead of time in FTC Scoring system. The event configuration task is the responsibility of the PDP or a designated administrator. For the 2021-2022 season, a PDP can give assign event creation to a Event Request Manager and the event configuration process to the Regional Admin or Event Admin role.

Prior to the event, data must be imported into the FTC Live version that will be running at the event. There are several ways to accomplish this, depending on who is present and the availability of internet access at the event venue.

Here is a summary table of which method is recommended for a given scenario:

<table>
<thead>
<tr>
<th>Internet access at setup time?</th>
<th>Event Admin/PDP access to FTC Scoring system at set-up time?</th>
<th>Recommended method</th>
</tr>
</thead>
<tbody>
<tr>
<td>YES</td>
<td>YES</td>
<td>Automatic Import (A)</td>
</tr>
<tr>
<td>YES</td>
<td>NO</td>
<td>Key-Based Setup (B)</td>
</tr>
<tr>
<td>NO</td>
<td>NO</td>
<td>Offline Setup (C)</td>
</tr>
</tbody>
</table>
10.2. **Getting Version Number and IP Address**
Start by opening FTC Live software. Due to software updates, it is useful to know the version number of the FIRST Tech Challenge Live software that you are currently running. It is also helpful to know the IP address of the scorekeeping server. This information can be obtained from the top of the browser screen when viewing the FIRST Tech Challenge Live pages.

![Software version number and system IP address](image)

Figure 17 - The software version number and the system IP address

10.3. **Logging in to the System**
- Select “Login” at the top-right corner of the screen.
- Log in with the username “local” and leave the password field blank.

![Login screen](image)

Figure 18 - Log in to the "local" account to gain access to the system.

**Important Note:** the “local” user account is the primary administrative account for the system. It is only available locally on the computer that is running the server application. Users should take care to secure this computer to make sure an unauthorized user will not access the “local” account.
10.4. **Logging in with Default Accounts**

The default account has username `local` and no password.

![Login Page](image)

*Figure 19 - The login page allows for a default account.*

10.5. **Navigating the System’s Home Screen**

Once you have logged in to the system, the home screen should look like the following image:

![Home Screen](image)

*Figure 20 - Selecting the FIRST Tech Challenge logo (upper left-hand corner of window) will take you to the system’s home screen.*

**Note:** If you do not have any events defined for your system, these lists will be empty.

![Home Screen Details](image)

*Figure 21 – Feedback, resources, and account info links are available in the upper right hand corner of the home screen.*

In the upper right-hand corner of the screen you will find:

- **Resources:** Opens a directory of scorekeeper-related documents, including printable scoresheets.
- **Feedback:** Submit your concerns to the *FIRST Tech Challenge* Live software developers.
- **Login:** User account information, you can also select the “Hello, local” link to get information about your current user account.
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

There are options available in the “Event Admin” menu:

- **Setup Event**: This will allow you to create a single event using an event key found on the “Play Event Locally” page in the FIRST Tech Challenge Scoring system or to enter the .db file for an Offline Event.
- **Create User**: This gives you the option to create individual user accounts for users that may only require access to a subset of the software features.
- **Manage Users**: When you have a list of users for the events, this section will allow you to manage the users and their system access.
- **Manage Server**: This allows you to manage the server for an event.

**10.6. Set Up an Event – Automatic Import**

The FTC Scoring system will automatically import the event into FTC Live. This method requires internet access and event management access to the event on FTC Scoring system, but is the easiest.

1. Run FTC Live. When the browser window pops up, login, but do nothing else. (Top banner is **DARK BLUE**)

2. Navigate to FTC Scoring system ([ftc-scoring.firstinspires.org](http://ftc-scoring.firstinspires.org)): (Top banner is **BLACK**)
   a. Log into an account with Admin access (Region Admins (PDPs), Region Managers and Event Admins) to the desired event.
b. Open the event’s home page, then select “Manage Event.”

![Image of event management interface]

Figure 24 - The selected event appears.

c. Select “Play Event Locally”.

![Image of event dashboard]

Figure 25 - On selected event dashboard, select “Play Event Locally”

d. Under the “Automatic Setup” section at the top, select “Import This Event.”
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

Figure 26 - Automatic Setup select “Import This Event”

e. This operation will open the FTC Live (DARK BLUE banner) software and require confirmation of the event setup from FTC Scoring.

f. Once confirmed, the Event Dashboard is transferred to FTC Live with traditional and hybrid functions.
10.7. Setting up an Event – Key-Based Setup

Using this method, someone with FTC Scoring system event admin permissions for the event gets a key from FTC Scoring, and sends that key to the scorekeeper running FTC Live. In this scenario, FTC Live must have internet access, but the scorekeeper does not require FTC Scoring system permissions.

A. Region Admin and Event Admin (FTC Scoring System):
1. Login to the FTC Scoring system (ftc-scoring.firstinspires.org, BLACK banner) with an account with Event Management access.
2. Navigate to the event’s home page and click “Manage Event”.

![Figure 29 - In FTC Scoring, select "Manage Event".](image-url)

4. Under “Manual Setup”, copy the Event Key, and send it securely to the scorekeeper or FTA. Do not give this key to anyone else.
B. **Scorekeeper (FTC Live)**

1. In FTC Live (**DARK BLUE** banner), login as local admin.
2. From the “Event Admin” dropdown menu at the top, select “Setup Event”.

![Figure 32 - Under "Event Admin," select "Setup Event."]

3. Enter the Event Key sent by the Event Manager and click “Submit”.

![Figure 33 - Event Key entry.]

4. It will show the event details and ask for confirmation. Make sure this is the correct event, and then hit “Confirm”.

**10.8. Set Up an Event – Offline Event**

Using this method, an Admin for FTC Scoring downloads a file from the FTC Scoring system, and sends it to the Scorekeeper/FTA or brings it to the event. This method does not require internet access at the event.

**Region Admin or Event Admin (FTC Scoring System):**

1. Prior to the event, login to the FTC Scoring system (**BLACK** banner) with an Admin account.
2. Navigate to the event’s home page and click “Manage Event”.

---

**FIRST®**

FOR INSPIRATION & RECOGNITION OF SCIENCE & TECHNOLOGY

Revision 3: 01.11.2022

4. Under “Offline Setup”, select “Download”. It will download a file to your computer. Send this file to the person running FTC Live or bring it to the event on a flash drive. Do not give this key to anyone not running FTC for this event.

**Gracious Professionalism®** - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
1. **Scorekeeper (FTC Live)**

1. In FTC Live (**DARK BLUE** banner), login as local admin.
2. From the Event Admin, select Offline Setup.

**Setup Event**

If you have internet access, you can setup an event by entering the Event Key found on the event’s “Play Event Locally” page on FTC Cloud. If you do not have internet access, proceed to "Offline Setup".

![Setup Event](image)

**Figure 37 - In FTC Live, select the "Offline Setup" option.**

3. The .db file upload page opens, select the Choose File option, then go to the location of the .db file (USB).
4. Once the file has been selected, select the “Setup Event” button to continue.

5. Review the information for the selected event and “Confirm or Cancel” at the bottom to transfer the event data from FTC Scoring. The dashboard for the event should appear once “Confirm” is selected.
10.9. **Setting Up an Unlisted Event**

If you are interested in testing the system outside of sandbox mode to experience the full features or plan to have unlisted practice matches that will not appear on ftc-events.firstinspires.org please use the following workflow for these purposes.

Note: This workflow does not include any syncing with the cloud-based FTC Scoring system.

1. Log into the downloaded version of FTC Live and login as the Event Admin using "local" as the user name with no password.
2. Once logged in, go to the “Event Admin” drop-down to select “Setup Event”.
3. Select the “Offline Setup” option and disregard the “Note”.
4. On the next screen, select “Manual Setup” to continue the process.
5. On the “Select Event” page, choose the “Create New Event” link.

6. You will need to create an unlisted event that is not synced with the cloud FTC Scoring. The red highlighted screens denote the required fields. Once complete, select “Create Event.”
7. Example of completed event information.
8. Complete steps 2-7 to get started with your event. Once these are complete you can go “Back to Event Home” to begin using the Match Control page and other features. The following sections explain how to complete the dashboard steps and use the Match Control page.

Note: “Create Match Schedule” will be unavailable until teams have been added.

10.10. **Sandbox Mode Set Up During Event Transfer**

If an event does not have official results or is for training purposes, use the sandbox mode. Sandbox mode can be accessed during the Event Key or Offline event transfer to FTC Live.
10.11. **FTC Live Event Dashboard**

Once you have created a new event, the local FTC Live system should display the *Event Dashboard*. You can also jump to the Event Dashboard for the event by selecting the event's "Dashboard" option from the "Event Admin" drop down menu.

*Figure 41 – You can use the Event Admin menu to navigate to the Dashboard if you have an event currently selected.*

Each step has an action and a status listed on the Event Dashboard. You can select a button to perform an action.
Note: Be sure to publish event results via Send Results to FIRST at the conclusion of the event.

Also, in the upper left-hand corner there is a “Back to Event Home” link. Selecting this link will take you to the home page for the currently selected event.

10.12. Creating Default User Accounts
You will need to create a set of user accounts that your volunteers can use during the event. Select the “Create Default Accounts” button on the Event Dashboard to display the Default Accounts screen.

Figure 43 – Press the “Generate New Random Accounts” to create a set of accounts for the currently selected event.
Press the “Generate New Random Accounts” to generate a set of user accounts that can be used to provide limited access to the system for specific users for the selected event. This may take a few seconds.

Press the printer icon in the upper right-hand portion of the screen if you want to print a hard copy of the list.

The password and access permissions for a user account can be changed by an event administrator by selecting the “Manage Users” item from the “Event Admin” menu and then using the resulting screen to review and modify information for the selected account.

New users can be added by an event administrator by selecting the “Create User” item from “Event Admin” menu. Select the “All Events” option (as shown) or select an individual event for the user. Note: one user can be selected for multiple user roles
When they are logged into the system, an individual user can also change his/her account password by selecting the “Hello” link in the upper right-hand corner.

An event administrator can reset the accounts back to their originally assigned passwords by selecting the “Reset Accounts” button.

10.13. Adding/Editing Teams for an Event

Important Note: Complete this step in the cloud-based FTC Scoring system NOT FTC Live, then transfer the event data to the local system. The process is almost the same for both systems but the data should be stored in the cloud. If needed, use this in FTC Live for teams that arrive at an event that were not added at the time of data transfer.

Select the “Add/Edit Teams” button on the Event Dashboard to add or edit teams for the selected event.

Note: The cloud-based system comes with a pre-populated list of FIRST Tech Challenge teams that are registered and paid.

You may be prompted to do a “Data Download” to update the populated teams. Follow the prompts.
Note: Check the version to make sure the event data will sync properly and is compatible with the current version of the cloud-based system.

**Adding a Team Individually**

Select the “Add Individually” tab:

- In the “Team Number to Add” field, type in the number of the team(s) you would like to add.
- Press the word “Add” to the right of the Team Number to add the team to the event.

![Figure 46 - Enter Team Number and hit "Add".](image)

- If the system already has the team’s data prepopulated, the newly added team number will appear along with its team information. If the system does not have any data for the team, the remaining columns for the newly added team will be blank.
- You can remove a team by pushing the delete button towards the right side of a team listing.
- You can switch to “Find by State/Province” mode by selecting the “Find by State/Province” tab.
- If you are done adding and editing teams, press the “Done” button.
Adding Teams by State or Province
Another option is to select “Find by State/Province” tab to add teams:

- The system should display a list of available pre-populated teams by selected region.
- Use the Country and State/Province controls to select the country and state/province to display.

Adding to event 'test_event_1'

Importing a List of Teams
You can use the Add/Edit Team page to add teams by selecting and uploading a team list file.

- The system can read team list files from past FIRST Tech Challenge seasons (prior to 2018-2019).
- An event administrator can also create a simple text file with a team number on each line of the file and use that as a team list.
- Press “Choose File” and use the pop-up file browser to find and select your team list file.
- After you have selected the team list file, press the “Upload Team List” button to upload the list data.
The uploaded teams should now be included in the team list for the currently selected event.

**Editing Existing Teams**
Select the “Add/Edit Team” button on the Event Dashboard, and then use the “Add Individually” tab to edit the team. When you are finished editing teams, press the “Done” button to leave the Add/Edit Team screen.

**Warning and Icon Meanings for Add/Edit Teams**
There are a number of icons that appear beside a team with data inconsistency. NOTE: This does not affect your ability to run a traditional event using FTC Live.

### 10.14. Adding/Editing Sponsors for an Event
The software comes populated with the following FTC program sponsors:

- **FIRST Tech Challenge** Season Presenting Sponsor: Raytheon
- **FIRST Tech Challenge** Official Program Sponsor: Qualcomm
- **FIRST Tech Challenge** Official Key Sponsor: PTC

These sponsors cannot be modified and need to be displayed at every event. In addition to the above sponsors, you may add regional or event sponsors.

Select the Add/Edit Sponsors to create or edit a sponsor list for your event.
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

Figure 51 - You can add/edit sponsors for an event.

- Press the “Add” button to add a new sponsor for an event.
- Enter the name of the sponsor.
- Select the type of sponsor (Global, Regional, or Event).
- Select the “Create Sponsor” button to create the new sponsor.
- Use the “Choose File” and “Import Logo” buttons to import a sponsor data file. Note: .png logo files work well with the software if available. You should always ask your sponsor for their official logo file.

Figure 52 - When you add/edit a sponsor, you should specify the sponsor’s name and level of support.

Sponsor information can be displayed on Audience Displays by using the “Video Switch” tab of the Match Control Page (for details, see the section “How to Display Sponsor Information”).
10.15. Creating the Match Schedule
If you have a list of at least four teams for your event, you can generate the match schedule. On the Event Dashboard, select the Create Match Schedule.

- You can edit the “Matches per Team” field (within the limitations set by the system) to adjust how many matches per team will be scheduled.
- You can edit the “Cycle Time” field to adjust the desired target cycle time for a match.
- You can press the “Default” button to use the default parameters to generate a simple match list (no match blocks or breaks included).
- You also have the option to create a more complex match schedule, with blocks of matches and breaks inserted in between.
  - Press the “Add Match Block” button to add a block of matches to the schedule.
  - Press the “Add Break” button to add a break in between matches to the schedule.
  - Adjust the start and end times for the blocks and breaks and provide labels (such as “lunch”, “morning”) for the breaks.

Note: It is important to set the start time for match play and insert any planned breaks if you intend to use the embedded software features that track match cycle times and overall on-time status of the event.
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

Figure 54 - You can create a more complex match list by adding breaks and blocks to the schedule.

- Once you configured your match blocks and breaks, you can push the “Run Matchmaker” button to run Idle Loop’s Matchmaker software. A progress bar should appear with an estimate on how much time to generate the schedule.

Figure 55 - Push the Run Matchmaker button to generate the match list for your event.

- Once the match list has been generated, it will appear towards the bottom of the screen. There is an option to display or hide the suggested match times for the schedule. By default, the match times are hidden.
- There are also checkboxes for Start Time and a Condensed schedule view in the upper-right if the generated schedule.
- After you have reviewed the match schedule, you can use the “<< Back to Dashboard” link to return to the Event Dashboard.
Figure 56 - The generated match schedule will appear towards the bottom of the screen.

Optional Inspection Schedules
Notice the Event Dashboard has been updated for the inspection schedules. “Configure Inspection Tracking” and “Configure Inspection Schedule”.

<table>
<thead>
<tr>
<th>Match</th>
<th>Field</th>
<th>Red 1</th>
<th>Red 2</th>
<th>Blue 1</th>
<th>Blue 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Qualification 1</td>
<td>1</td>
<td>8089</td>
<td>7804</td>

</tbody>
</table>

* 15 minute break for consecutive match per <COE>
10.16. **Configure Inspection Tracking**
Be sure to configure the inspection tracking and finalize edits prior to generating the inspection schedule to provide consistency in the schedule.

**Status Tracking Configuration:**

**Tracking Settings**
- Check-In
- Judging
- Robot Inspection
- Field Inspection

*Warning: Changing these parameters after starting inspection may lead to unexpected results for teams who have already started inspection. Inspection forms checkboxes will not revise scores.*

**Custom Tracking**

<table>
<thead>
<tr>
<th>Name</th>
<th>Abbreviation</th>
<th>Type</th>
<th>Add</th>
<th>Delete</th>
</tr>
</thead>
</table>

**State Settings**
- Automatically set late status
  - Mark team as late
  - Mark team as Very Late

*Note for this functionality to work, you must use the "Form Status" feature on the Activities List on the judging & inspection schedule generation page.*
10.17. Configure Inspection Schedule

Once you select this event dashboard option, the Inspection Editor page will open. Schedule judging, robot inspection and field inspection.

Generating the schedule will give you a list of teams, day and time for each team added to the event.

- **Time Periods**: allows you to break up the day into specific time blocks.
- **Activities**: You can also add additional event activities to the schedule using the “Activities” field on the right-hand side.
- The system sets default time and stations though this can be edited.

Note: You will need to select “Bind Status” to confirm if a team was late to a specific type of inspection, ie. judging.

Note: Do not use this software to schedule judging for Hybrid Events. Hybrid Event judging should be scheduled using the FTC Scoring cloud based software, especially if you intend to use the embedded video conferencing capability.
Example of multiple timeslots for inspection.

11. Match Control and Scoring

If you successfully created a match schedule for your event, then you are ready to begin controlling (initializing, running, and scoring) the matches. Go to the “Back to Event Home” in the upper-left hand corner to return the homepage. The Event Homepage includes all of the links you will need for the actual event after the event dashboard setup in complete.

Event Home Page

You can navigate to the Event Home Page from the Event Dashboard by selecting the “< Back to Event Home” link that is in the upper left-hand corner of the screen. Depending on your user account permissions, the home page will display categorized lists of features that are available from the server. As the “local” login the following display is shown.

- Event Info – These links display important event-related information. A scorekeeper can review and print out information such as the match schedule, team rankings, and match results using these links. Also, a pit display can be launched from a link in this category.
- Inspection – Another access point to view and print these schedules.
- Referee Score Tracking – A referee would use these URL links to score for the red or blue alliance.
- Displays – Access the display menu to select the appropriate options for your event displays.
- Judging –Manage Awards Note: this is also an option on the event dashboard.
- Event Administration – These links take the user to the event dashboard or the Match Control page.
11.1. **Examples of Scoring Workflows**

Before examining the details of the Match Control features that are available with the system, it is helpful to look at the workflow for scoring an event. The following explains paper scoresheets, then live scoring with tablets.

**Scoring Using Paper Scoresheets**

The system can be used with [paper scoresheets](#) to control and score an event. For this scenario, the typical workflow is:

- Load Match
- Show Match Preview
- Randomize Field
- Run Match
- Manually Enter Scores
- Commit Results
- Display Results
For a detailed explanation of how to score with paper scoresheets or tablets watch the Scoring Referee training video. Note: For traditional or hybrid events, this role is usually the Scoring Referee and for remote events this role can be filled by a team member or volunteer.

**Scoring Using Wireless Tablets**
Wireless tablets can be used for real-time score tracking. The workflow for the scorekeeper is as follows:

- Load Match
- Show Match Preview
- Referees Submit Pre-Match Info
- Randomize Field
- Run Match
  - Referees track, then submit Autonomous.
  - Referees track, then submit Driver-Controlled.
  - Referees review, then finalize their scores.
- Commit Results
- Display Results

### 11.2. Match Control Page
Select the “Match Control Page” link to display the Match Control Page.

![Match Control Page](image)

The Match Control Page is where the scorekeeper will spend most of their time. It is where the match timer is controlled, as well as, where scores are edited. It is recommended that the Match Control Page be used in full screen mode, and that the user not navigate away from the Match Control Page’s browser tab. If the user would like to have two or more active browser screens on their laptop (for example, if the user wanted to display the match control page and the field display page), it is recommended that user have two separate browser windows launched on their computer.

**Important Note:** Only one Match Control Page should be open per scoring server per event. More than one Match Control Page can result in confusion, and inaccurate and unpredictable match results.

*Gracious Professionalism®* - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
At the very top of the Match Control Page, lists information about the current “Loaded Match” and the current “Active Match”.

- **Loaded Match** is the next match to be played. The alliance lists turn green once the referee has submitted initialization data for that alliance. When both are green, the match start button turns green to allow for the match to start.
- **Active Match** shows the match currently in progress and the time left. The buttons progress through the match flow, generally from left to right. Green buttons indicate the next steps, yellow buttons indicate repeated actions (that are allowed), and red buttons indicate non-standard match flow operations, but are still allowed. Grey buttons cannot be used at the time.

**Match Control Buttons**
The buttons on the Match Control Page below Loaded and Active Match, allow for the control of the match flow.

- **Load Next Match** - This button will load the next match in the schedule for play, allowing referees to input initialization data and allowing randomization of the field. To load a different match, use the Play / Replay button on the schedule tab. If no matches exist, the button does nothing.
- **Show Preview** - Audience Displays will show the list of teams competing in the next match, and their current rank.
- **Randomize Field** - This will generate a random number to use to configure the field before the match. If external randomization is enabled in settings, a tooltip will appear below the button to allow selection of a value. Clicking again will prompt for confirmation, but will allow re-randomization.
- **Show Randomization** - This will show the randomization value and corresponding field state on Audience Displays.
- **Show Match** - This prepares the displays for match start by showing the screen used during a match.

- **Start Match** - Starts the match. This button is not available until after the field has been randomized. It is red until both referees have submitted initialization, but can still be clicked when red. After match start, it turns into an “Abort Match” button, which is used to reset the match timer. After an abort, the match returns to the Waiting for Init stage, and referees must refresh their pages and re-submit initialization before the start button turns green again.

- **Commit & Post Last Match** - This is a convenient button that is available once the previous match’s scores have been submitted by referees, and the next match has not yet started. It will both save the results of the previous match, and show them on screen. This button should only be used after confirmation signal from the head referee that all data as entered by the referees is correct and no cards need to be given. Otherwise, matches can be edited, committed, and posted from the schedule tab /edit scores tab.
**Match Control Tabs**

The Match Control Page has several tabs that can be used to switch the information displayed on the screen:

- **Schedule** - Shows list of matches, their status, teams, and scores. From this tab, which match to play can be selected, and matches can be selected to edit or show results. (Schedule is shown)
- **Incomplete Matches** - Shows the matches that have **been started but not completed** (committed to the database).
- **Score Edit** - Used to edit scores or enter paper scoresheets. Click **Edit** on a match in the Schedule tab to load this tab.
- **Active Match** - Shows the live scoring state of the match currently being played, or the last one played. Looks like score edit tab but cannot be edited. After a match is complete, it provides a button to edit scores.
Settings
  - Test Mode – Switches the system into Test Mode, where Test Matches can be created & run.
  - Timeout options.
  - Live Scoring toggle – Deselect if using paper scoresheets.
  - Control Page - option to flip alliance layout.
  - Sync Settings – Allows you to change sync timing and test the HQ sync connection.
  - Reset Alliance Selection, if necessary.

- **Alliance Selection** – Shows teams ranking and selects alliances.
- **Video Switch** - Used to show sponsors, bracket, audience key, wifi reminder, ranks, and blank screen.

Timeout Info – This will be updated in the November 2021 version.

**How to Display Sponsor Information**
You can display the list of sponsors on an Audience Display using the tabs that are available on the Match Control screen.

1. Select the Video Switch tab, then the “Show Sponsors” button.

![Match Control Screen](image)

*Figure 61 - Select the "Show Sponsors" button to display the sponsor information on Audience Displays.*

2. Select “Show Sponsors” button to display the sponsor information on the Audience Displays at your event.
3. The Audience Displays should automatically begin displaying the scrolling sponsors for your event.

![Audience Displays](image)

*Figure 62 - The Audience Displays with sponsor information.*

**Gracious Professionalism**® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
How to Display the Audience Key
Select the Video Switch Tab and scroll-down to Other Displays:

Once you select the “Show Audience Key” the audience display will have an infographic explanation of the game elements and scoring icon changes for teams’ scoring tasks.

11.3. Scoring/Timing Displays
A laptop or computer that is connected to the same network as the system server can be used to display scoring and timing information. Return to the event home page to change displays.

- Field Display – The Field Display provides basic match and timing information for the teams and volunteers on an active competition field. If live scoring is enable, it also provides live score information.
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

- Audience Display – The Audience Display provides match and timing information, formatted for spectators. If live scoring is enabled, it also provides score information including a graphical representation of the state of the field during a match. When the results of a match have been committed and posted, the results information should display on the audience displays.
• **Overlay Display** – The blank portion of the screen is where a video feed (typically live camera footage of the match) can be overlaid onto the screen using chroma key technology.

![Overlay Display mode](image)

You can have multiple devices acting as Field or Audience Displays on your network. It is strongly recommended that these devices are connected to the server through a wired (Ethernet) network to avoid interfering with the wireless control systems of the robots. Or, if a wired connection is not convenient, a wireless connection can be used, but it should be configured so that it operates on a Wi-Fi channel that will not conflict with the wireless control systems of the robots.

**Setting up a Display**

Before you can set up a Field or Audience Display, you will need:

- Verify that you have the IP address of the system server.
- Launch the Google Chrome browser on your display computer.
- Typing in the IP address to navigate to the system server.

![Type in the IP address to navigate to your system server](image)
• In the Event home page for your selected event, select the “Scoring/Timing Displays” link.
• On first load, the “Display Settings” is the default page. The “Display Type” allows you to choose a Audience, Field, Overlay display, as well as binding the display to a field.

![Display Settings Dialog](image1)

**Figure 67 - Display Settings Dialog.**

• Choose “Use Overlay” when a chroma is desired to allow overlaying live video with scoring data.
  - The software DOES NOT accept input from video sources or do any mixing itself. This setting is used to format the audience display to allow third-party software (such as OBS Studio, vMix, or other audio/video mixing tools) to mix audio/video signals for production broadcast or displays.
  - When “Use Overlay” is selected, a new “Overlay Settings” menu becomes available to select overlay settings.

![Overlay Settings Dialog](image2)

**Figure 68 - Overlay Settings Dialog.**
- Pick Color – This is used to select the chroma color. It is important to select a chroma color that is compatible with mixing tools and does not conflict with colors used in the scoring displays. For FREIGHT FRENZY, two chroma colors are recommended:
  - Lime Green (RGB color value #00ff00)
  - Fuchsia (RGB color value #ff00ff) - staff favorite
  - Other colors may be manually entered if required but be careful!
- Alliance Selection Display – Choose the type of display used for Alliance Selection. There are two options:
  - Classic – Alliance Displays will NOT contain chroma elements for mixing. Use this setting if your video mixing involves “chopping” the lower thirds of the display instead of applying an actual chroma.
  - Hybrid – Alliance Displays WILL contain chroma elements for mixing. Use this setting if your video mixing actually uses the chroma for mixing video and WANT to use live video mixing during the Alliance Selection process. Note that the location and size of the chroma for Alliance Selection is different than during matches. Use the “Set Audience Display” button on the “Alliance Selection” tab of the Match Control Page to test setup for this mode.
- Awards Display – Choose the type of display used for Awards mode. There are two options:
  - Classic - Alliance Displays will NOT contain chroma elements for mixing. Use this setting if your video mixing involves “chopping” the lower thirds of the display instead of applying an actual chroma.
  - Hybrid – Alliance Displays WILL contain chroma elements for mixing. Use this setting if your video mixing actually uses the chroma for mixing video and WANT to use live video mixing during the Awards ceremony.

- The “Audio Testing” buttons at the top can be used to play the game audio cues to test the PA system.
- Select which Display Mode for the computer you are configuring.
- If you bind the display to a field, then it will only show events for the specified field.
- “Advanced Settings”
  - If you are not using real-time score tracking, disable the “Show Live Scores” option.
  - The “Alliance Orientation” is also here. This can also be found under “Settings” on the Match Control Page.
• Displays must be shown in full screen.
• Google Chrome is recommended.

**Note:** Test that Scoring/Timing Displays update automatically as the scorekeeper changes the state of the active event.

### 11.4. Scoring Using Paper Scoresheets

The system supports scorekeeping using paper scoresheets and a very basic system configuration (see Figure 3 on page 14). This configuration has a single laptop that functions as the FTC Live server, the Match Control laptop, and as the Audience Display. Referees use paper sheets to score the matches. These are found in the Resources folder or Scoresheets. After a match is complete, the scorekeeper manually enters the values through the Match Control page.

**Configuring the Event for Paper Scoring**

On the Match Control Page, under the “Settings” tab, deselect the “Use Live Scoring” checkbox. This will simplify the match flow for paper scoring and will automatically set the displays to not show live scores.

**Configuring the Audience Display**

On the laptop, the scorekeeper should have two browser windows opened. One window should display the Match Control screen. The other window should be configured as an Audience Display with the “Show Live Scores” option disabled (see image below). Both browser windows should be logged in as the “local” user.

*Figure 69 - Make sure the "Show Live Scores" option is disabled (unchecked).*

**Gracious Professionalism®** - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
If the “Show Live Scores” option is disabled, then the Audience Display will only display match and timing information. No real-time scores will be displayed.

**Note:** The Audience Display browser window should be maximized in the externally connected HDMI monitor so that the teams and audience can see the timing and match information clearly.

**Step-by-Step Example: Scoring with Paper sheets**

1. Scorekeeper selects the match that he/she wants to score and pushes the “Play” button that appears next to its listing on the Match Control Page (or the Scorekeeper pushes “Load Next Match” if the next match in the schedule is to be played). The match should be listed as the “Loaded Match” near the top of the Match Control screen.

![Figure 70 - Press "Load Next Match" or "Play" button to load a match. It will be listed as the “Loaded Match” near the top.](image)

2. The scorekeeper presses the “Show Preview” button on the Match Control Page. This should force the Audience Displays to display information about the upcoming match.

**Note:** On the Match Control Page the “Show Preview” button should change from green to yellow after the button has been pressed.

![Figure 71 - The Audience Display should display match info after the “Show Preview” button has been pressed.](image)

3. Select the Randomize Field button on the Match Control page or the referees can roll a physical die and use the result to determine how to place the game elements for the autonomous phase.
4. The scorekeeper can push the “Show Match” button to show the match information, which for this scenario will include the alliance team numbers and the match clock.

5. The scorekeeper pushes the “Start Match” to run the match.

**Note:** The “Start Match” button might be colored red if the live scoring setting has not been disabled. Please disregard, because it is “waiting” for pre-match information from a score tracking tablet for live scoring.
6. After the match begins, the Audience Display should play the audio cue indicating that the match has begun and the countdown timer on the display should be active.

**Note:** that the scorekeeper has the option to abort the match by pushing the “Abort Match” button while the match is active.

7. After the match is complete, the scorekeeper collects the paper scoresheets from the referees and then, and then selects the “Enter Scores” button next to the match to pull up the electronic version of the scoresheets on the Match Control screen.

8. The scorekeeper should manually enter in the score values through the Match Control Page. The scorekeeper should then press “Save Edits.” When ready to show the scores, click “Commit” and then “Post Results.”
9. The scorekeeper can repeat the process for subsequent matches.
10. There are prompts for inaccurate scoring within the system in case mistakes are made on the paper scoresheets, for example:

11.5. **Live Score Tracking Using a Tablet**

**Connecting a Tablet to the Server**

A tablet running Google Chrome can be used to manually track scores during a match. Before you can begin live score tracking, you will need to know the IP address of the computer that is running the system server. Usually, this will appear on the FTC Live banner along with the version number. You also will need a user id and password that has referee (i.e., score tracking) permission for the event generated as a default account.

**Note:** that if you implement live score tracking using a pair of wireless tablets, make sure the operating Wi-Fi channel for the score tracking tablets will not conflict with the wireless control system of the robots.

To connect to the server, use the following steps:

- Verify that the tablet is connected to the same network as the FTC Live server.
- Launch the Google Chrome browser on the tablet and type in the IP address into the Chrome address/navigation bar to navigate to the FTC Live server.
Figure 76 - Type in the IP address (which you can get from your IT admin) of the server in the browser's address bar.

- If you successfully connect to the FTC Live server, you will see the system home page. Select the upper right-hand three bar menu icon to display the menu options for the home page. The “Resources” “Feedback” and “Login” links should appear towards the top of the screen.

Figure 77 - Select upper right-hand menu icon to display the "Feedback" and "Login" menu options.

- Select the “Login” link and follow the onscreen instructions to login to the appropriate user account.
If you have successfully logged in, you should see the home page with a listing of Event Info and Referee Score Tracking.

On the Event Home page, select the appropriate Referee Score Tracking link (Red Alliance or Blue Alliance).

If prompted, select a field if you want to bind the tablet to a specific field or select “All Matches” if you would like to use this tablet to score all matches for this event.

*Gracious Professionalism®* - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
If there are no active matches yet, the tablet will display the following message. You will have to wait for the scorekeeper to prepare a match to play before the screen will change.

**Figure 79 - Select a field if you want to bind tablet to a specific field, or select "All Matches" to score all matches with this tablet.**

- If there are no active matches yet, the tablet will display the following message. You will have to wait for the scorekeeper to prepare a match to play before the screen will change.

**Figure 80 - If there are no active matches, then this message will appear.**

**Step-by-Step Example: Scoring an Event with Wireless Tablets**

In this section, we will go step-by-step through the process of scoring an event using wireless tablets for real-time score tracking. Scorekeeper is logged into the system with Event Admin privileges and has a browser window displaying the Match Control page for the selected event. The referees who are score tracking for the event have connected their respective tablets to the server and are logged in with score tracking access. We also assume that there is a Field Display computer and an Audience Display computer and these devices are properly configured and connected to the server.

1. Scorekeeper selects the match that he/she wants to score and pushes the “Play” button that appears next to its listing on the Match Control Page (or the Scorekeeper pushes “Load Next Match” if the next match in the schedule is to be played). The match should be listed as the “Loaded Match” near the top of the Match Control screen.
2. The scorekeeper tablets should display the match (or matches) that are available for scoring. Both referees (Red Alliance and Blue Alliance score referees) should select the match that they will be scoring.

3. The scorekeeper presses the “Show Preview” button on the Match Control Page. This should force the Audience Displays to display information about the upcoming match.

Note: On the Match Control Page, the “Show Preview” button should change from green to yellow after the button has been pressed.
4. The score tracking referees should see a screen that displays the Pre-Match Setup state for their alliance. Each referee (red and blue) should use their tablet to update the Pre-Match Setup state to match the state on the field.
   a. The system needs to know if each team is present.
   b. The referees should press the respective “Alliance Ready” buttons at the bottom of their screen after they have entered in the current state of their Pre-Match field.
   c. Team 7804 is present. Team 8089 is present.
   d. Enter whether each team is using the duck or swapping in their TSE on their Barcode.

![Image of Pre-Match Setup screen]

5. Once the Pre-Match information has been entered, the referee tablets will display a message that indicates that the system is waiting for the match to start.

![Image of waiting for match start]

6. The scorekeeper should press the “Randomize Field” button to “roll” the virtual die to determine how to configure the minerals for the Autonomous portion of the match.
   a. After the field has been randomized, the score tracking tablets will display the randomization results.

![Image of randomized minerals]

---

**Figure 83** - The Audience Display should display match info after the “Show Preview” button has been pressed.

**Figure 84** – Each referee should update the Pre-Match state information and then press the “Alliance Ready” button.

**Figure 85** - Referee tablets will indicate that they are waiting for the match to start.
b. The Audience Display, however will not show the randomization results until “Show Random” is selected. Instead, the Match Preview information should still be visible.

Figure 86 - Score tracking tablets will show randomization, but will still be waiting for match to start.

7. The scorekeeper should press the “Show Random” button to display the randomized information on the Audience Displays.

Figure 87 – After the “Show Random” button has been pressed, the Audience Display will show randomization info.

Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
8. The scorekeeper should press the “Show Match” button to show the match information on the Audience Displays and the Field Displays.

![Image](Field_1.png)

*Figure 88 - The Audience and Field Displays should display the match information (Audience Display shown).*

9. When everyone is ready to begin, the scorekeeper pushes the “Start Match” button to start the match.

![Image](Start_Match.png)

*Figure 89 - Scorekeeper presses “Start Match” button to start the match.*

10. During the autonomous phase, the referees should enter the score tracking data using their respective tablets.  
    a. While the scores are being entered, the score values on the Audience and Field displays should be updated with the current score tracking values.  
    b. The scorekeeper can press the “Active Match” tab on the Match Control Page to monitor the score tracking data.  
    c. The match information (including the time remaining on the countdown timer and the state of the match) are listed for the “Active Match” at the top of the Match Control Page.
11. Once the Autonomous phase is complete, the referees should verify their autonomous scores and push the “Submit Autonomous” button to submit the autonomous scores to the system.

![Figure 90 - The scorekeeper can press the “Active Match” tab to display the active match information.](image)

12. During the Driver-Controlled period, referees should enter the scoring data using their tablets.

13. Once the Driver-Controlled period is complete, referees should quickly enter the state of any scoring done at the end of the match and then push the “Submit Driver-Controlled” button to enter the review phase. Note that the scores will continue to update on the displays until the referee enters review. Once in review, changes do not reflect on the displays.

![Figure 91 – Referees should push the “Submit Autonomous” button to submit their autonomous scores.](image)
14. After the referees submit the Driver-Controlled data, they have an opportunity to review and edit all the scoring data for the match that was just played.
   a. The referees can adjust their scores if needed.
   b. The referees should each press the “Submit Final Scores” when they are ready to submit their final scores for a match.
15. After the referees have submitted their final scores, under Schedule, the scorekeeper has the option to edit the scores even further. To commit the scores push the “Commit & Post Last Match” or the “Commit” button listed next to the match.

16. Once the scores have been committed, the Scorekeeper can push the “Post” button to post the results to the Audience Displays.
   a. The scorekeeper also has the option to “Replay” the match if the referees determine that a replay is warranted.
   b. The scorekeeper also has the option to “Edit” the scores for the match.

**Note:** If the match is complete and the referees have not yet submitted their final scores, the scorekeeper has the option to force an edit of the match score data.
c. If this is done before the referees submit their final scores, the referees will not be able to submit
finals scores for the match (the scorekeeper is overriding their scores).
d. This option allows a scorekeeper to enter score data from a paper scoresheet, if, for example,
live scoring is not available during a match.
e. In general, however, scores should be submitted by the referees using their score tracking
tablets.

![Image](image.png)

*Figure 95 – Scorekeepers can edit/override the score data by selecting the Force Edit button.*

**Note:** The scorekeeper can abort the match by pushing the “Abort Match” button during the match.

f. The system will prompt the scorekeeper to verify that he/she really wants to abort the match.
g. If a match is aborted, referees will need to manually refresh their tablet browsers to display the
current state information for the match.
h. After a match has been aborted, it can be replayed. Note the field might need to be re-
randomized before replaying a match.

17. Once this process has been completed, the scorekeeper can press the “Load Next Match” button to
start the process again for the next match in the schedule.

### 12. Managing Elimination Matches

1. Once the qualifying matches have been completed and committed, the scorekeeper can press the
“Alliance Selection” tab on the Match Control Page to begin the Alliance Selection process.

![Image](image.png)

*Figure 96 - Press the Alliance Selection tab to begin the selection process.*
2. Press the “Start Alliance Selection” button will display a ranked list of teams on the Match Control screen.

3. The scorekeeper should push the “Set Audience Display” to toggle the Audience Displays to Alliance Selection mode.

4. Press the “Captain” button next to a team to designate the team as an Alliance captain. If an eligible team is unable to be an alliance captain (for example, if the team must leave the event early) press the “Remove” button in their listing to remove them from the selection process. Once an alliance captain is selected, their team number should appear as the Alliance Captain, and the list of available teams will be updated.
5. As the Captain makes his/her Alliance’s first invitation, the scorekeeper can press the “Accept” or “Decline” button for the invited team to indicate whether the team accepted or declined the Captain’s invitation. The Alliance Selection Displays will update as the buttons are pressed.

![Figure 100](image1.png)

*Figure 100 – The scorekeeper should press the “Accept” or “Decline” button listed next to a team to accept or decline an invitation.*

![Figure 101](image2.png)

*Figure 101 - As teams accept or decline alliance selection requests, the Alliance Selection Display gets updated accordingly.*

6. Once the first alliance captain has made their initial selection, the process begins again for the team that is eligible to captain the second alliance.

**Note:** that the software will adhere to the Alliance Selection rules that are prescribed in the official Game Manual when determining and displaying selection eligibility for the remaining teams.

The selection process is repeated until all alliances are finalized. If the scorekeeper needs to undo the most recent alliance selection, then he/she can push the “Undo” button on the Match Control screen.
7. When the alliances are finalized, the scorekeeper should press the “Generate Matches” button to generate the elimination match list. Once the elimination matches have been generated, the scorekeeper can select the “Schedule” tab to view the elimination schedule.

8. Once the elimination schedule is available, the scorekeeper and referees can run the matches in a manner similar to how the qualification matches are run. However, if there are more than 20 teams participating at your event, the elimination matches will list three teams per alliance. For an event with 3 teams per alliance, during the Pre-Match Setup of an Elimination match, the referees will need to designate which two of the teams are competing in each match.
9. In figure above the referee has indicated that Teams 11780 and 8089 will be playing in the match while team 13507 is sitting out the match for the Red Alliance.

After the first elimination match of a semifinal round has been played, when the referees view the Pre-Match Setup screen for the next match in that semifinal round, a message should appear at the top of the screen indicating which of the three teams did not play in the previous match. This warning appears so that the referee can verify that all three teams for each alliance participated in the elimination matches per the official Game Manual, part 1 (if an alliance has three teams, then “the team that sits out the first match must play in the second match, with no exceptions”).

The system lets the scorekeeper run the matches until each semifinal round has a winning alliance. The scorekeeper can edit, commit, and then post the results for each elimination match. If the alliances in a semifinal round are tied, the system will generate an additional tie breaker match and automatically add it to the elimination schedule.

![Figure 105 - The system will automatically add a match to the schedule if the alliances are tied.]

When the semifinal matches are complete, the system will automatically generate final elimination matches for the two winning alliances. The final elimination matches are scored in a manner similar to the semifinal matches. The scorekeeper can edit, commit and post each final-round match. If the alliances tie, the system will automatically add a new match to the schedule.

![Figure 106 - The system will automatically generate the final matches after the semifinal matches are complete.]

Once the final matches are complete, the scorekeeper can post the final match results to the Audience Displays and display the winning alliance.
13. Managing League Events (Regions with Leagues)

Important Note: League setup MUST be done in the cloud-based FIRST Tech Challenge Scoring (FTC) by a PDP/admin including adding teams, parent/child leagues.

- Leagues can no longer be created in the downloadable FTC Live software.
- There are three league structure options for FIRST Tech Challenge.
- League data has been centralized in the FTC Scoring system so terminology has been standardized.

Overview of Leagues

League - A group/association of teams in a specific geographic location. This group of teams competes in meets, and then a league tournament. Each league tournament is associated with exactly one league. All teams that compete at a league tournament must be members of one league.

Child League - An optional subset of a league (the “parent” league) that compete together before joining the rest of the parent league’s teams at the league tournament. All teams in a child league are also members of the parent league. This structure exists for regions that run large league tournaments and wish to divide teams up to help organize meets.
**League Meet** - Meet is a one-field competition that uses the same field and game elements as other FIRST Tech Challenge tournaments. However, for a league meet, the event is abbreviated, and only includes qualification matches (but no judging sessions, awards or elimination matches). Results carry forward to future meets and the league tournament.

**League Tournament** - The final event in league play. Each league tournament is associated with exactly one league. Team rankings incorporate performance in matches from league meets. League tournaments include judging and awards. Teams advance from a league tournament to a super qualifier or regional championship.

**League Configurations**
In previous seasons, leagues have been managed in different regions using different terminologies. Data has been centralized into FTC Scoring system so the terminology has been standardized. Below are examples of how to transition from prior systems into the FTC Scoring system league set up. In all cases, the outcome is functionally equivalent to the prior season experience.
Standalone League Model
Regions that run single-league events and league tournaments with no inter-league play. Follow the steps in the section: Creating Leagues for Your Region.

Inter-League Model
Regions that ran leagues where multiple leagues may have been present at a single event, for example, inter-league tournaments (ILTs) or other inter-league play.

This model follows the standalone league model until the league tournament, where multiple leagues play in the same league tournament. In this model, the leagues are usually isolated until the ILT, but some variants may exist where teams play in meets with teams from other leagues.

To enter this format into the system, first create a league (parent) that includes all teams that will play at a single ILT. Then, you can create a child-league to split the teams into the same groupings as you would have previously.

Example Scenario:
In a previous season, league A and league B each had 20 teams. The two leagues played separate meets, but played together at a 40 team ILT.

Scoring System: Create one league with all 40 teams. Then, create a Child League A and a Child League B. Add the appropriate teams to each child league. All of the child league meets can be associated with their respective child league, but the ILT must be associated with the parent league.

League Structure – Inter-League Model
How to Create an Inter-League: Add all teams to a parent league, then add teams to child leagues.

Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
Metro League Model
In this model, league inter-play is very common. Teams may play in any meet, and data is aggregated from the various meets at the League Tournament. Teams or events may be grouped into multiple leagues, but can play in any meets.

To enter this format, create one league and add all teams participating. Create a meet for group of teams playing at a specific meet (Meet 1). For example, Meet 1 and Meet 2 (shown below) may take place on the same day and should be considered separate events for the purpose of team rankings within the parent league. You may create Child-Leagues if desired. Ensure that no team plays in a meet associated with a different league. It is OK if they play with a different Child League, but not a different Parent League.

League Structure – Metro League Model
How to Create a Metro League: Add all teams to a parent league. Teams play at different meets within the parent league.
13.1. Creating Leagues for Your Region

League creation and setup MUST be done in the cloud-based FTC Scoring system by a person with Region Administration Rights. It CANNOT be done in FTC Live. Similarly, the association of an event to a league MUST be done in the FTC Scoring system.

1. Log in to the FTC Scoring system with your FIRST dashboard login.
2. Select your region. This takes you to the main Region page with a list of options: Events, Teams, Leagues, Sponsors and Users. To set up a league go to Leagues, then Create League.

3. Specify a unique League Code, following the same rules as event codes (all lowercase letters and numbers and underscores, no whitespace, preferably one word).
4. Specify the League Name and the Location.
5. Select "Create League."

Figure 108 - Create a Dummy event to create your leagues.
7. Add the teams to the parent league by selecting them from the region list:

Important Note: Verify that teams have been added to the league prior to the event.

Note: Yes, you can add teams to events in FTC Live. If the event has been configured the team data will sync with FTC Scoring and appear on ftc-events.
Alternatively you can click on add individually and use a text file with a list of the team numbers to add all the teams in the league.

**Associate Events and Leagues:**

1. You will need to return to the main region page (go back or select the FTC logo), then select “Events” to access the individual league events to add/edit teams.

2. Select the event to edit.

3. Then select “Manage Event” and the “Event Configuration” in the dashboard.
4. Choose the league to associate to the event (parent or child).

Manage Teams for League Events
1. League Admins or the Event Admins should add teams to a league event. Go to the league’s home page, then select “Events”. Go to the “Manage Event” option.

2. Select the "Add/Remove Teams" button.
Gracious Professionalism® - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”

3. Selected teams will appear in purple, when finished, click "Done".
   b. Select "Back" in the top-left corner to return to the selected league event dashboard.
   c. Repeat steps for each additional league and events for your region.

Create a Child League
1. To create child leagues, you will first need to create the parent league. Then select the “Leagues” tab and the “Create Child League” appears.
2. Enter the “League Code”, “League Name” and the “Location” and save the edits.

Add Teams to the Child League

3. Go to “Teams”, select “Edit Team List” to choose teams for the child league.

4. Just like parent league set up, choose from 4 options to add/edit teams then select “Done”.

5. Once you’re done creating child leagues, go back to the parent league, then select “Leagues” to view the child league(s).

Rankings for Parent/Child Leagues

League Rankings will appear on the “Rankings” tab.
Note: As an administrator, you will see the league rankings from unpublished events, so they may differ from other sources until an event’s results are published. A child league’s home page will also show league Rankings, however those rankings are for fun. They have no competitive meaning at the League Tournament, and may not accurately reflect the full rankings, which are shown in the parent league’s ranking.

**Important Note:** Scorekeepers at meets should not edit the league team list unless instructed to do so. If they believe the list is wrong, they should leave it and notify the League Manager after the event. An incorrect league team list will not affect match data, as long as the event’s team list is correct.

### 14. Managing Awards

This section describes the judging features available in FTC Live. For remote judging used in remote and hybrid events please make sure to review the [Event Administrator Guides](#) on the website and consider certifying as an Event Admin.

**Judging**

Teams can be marked for status for their judging sessions.

If you are running an event that is not a League Meet, then your Event Dashboard should include a step that allows you to manage awards for your event. Press the “Manage Awards” button to begin the awards management process. This can also be found in Judging, by selecting the FIRST Tech Challenge logo.

![Manage Awards](image)

*Figure 114 - Press the “Manage Awards” process to start the awards management process.*

When you first launch the Awards Manager, the system will default to the “Give Awards” screen (see figure below).

**Gracious Professionalism®** - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
The “Give Awards” screen lists all of the awards that are defined for the current event in the order that they are to be given. Awards that are highlighted in red must be given per Judging Manual rule on equitable distribution of awards. Awards that are highlighted in green have already been “given” (i.e., winners have been assigned).

### 14.1. Giving an Award

When you are ready to give an award to a team, select it on the “Give Awards” screen. After you have selected the desired award, enter the required information for each team or individual. You can also enter text to describe why the winner was selected in the “Judge’s Comments” section. This text will appear in the awards ceremony script.
Figure 116 - Select the "Edit" button to edit the selected award.

Press “Save” to save your changes.

Figure 117 - After assigning winners and providing justification text, press "Save" to save the award information.
14.2. Managing the List of Awards

You can select the “Manage Awards” button to modify an optional award. You can also modify the order of the awards by selecting an award listing, and then using the mouse to drag it to its new location in the presentation order.

**Note:** The mandatory awards are supposed to be presented in the original order as listed by the system. Also note that the system will not let you edit or delete a mandatory award, you can only edit optional awards.

![Awards Manager](image)

*Figure 118 - You can edit optional awards. You can also reorder the awards by selecting and dragging the award name.*

Once you have finished managing your awards, you can return to the “Give Awards” screen to continue giving the awards (i.e., assigning winners for the awards).
14.3. **Viewing / Printing the Awards Script**

Once you have given out all the awards (i.e., once you have assigned winners to each award) the list on the “Give Awards” screen should be green.

![Give Awards Screen](image)

Press the “View/Print Script” button to view the award script. Press the “Print” button to print the script.

Welcome to the [insert event name] Awards and Closing Ceremony! As many of you know, FIRST is a non-profit and a global movement transforming lives and inspiring future innovators, and problem solvers. FIRST engages young people, from pre-k through 12th grade in our STEM programs including FIRST LEGO League, FIRST Robotics Competition, and of course, FIRST Tech Challenge. Our STEM programs are a fantastic opportunity to have the hardest fun you’ll ever have!

Speaking of the hardest fun you’ll ever have, what an outstanding day we’ve had! Before we hand out our awards, let’s thank the awesome people who made this event happen. Today could not have been possible without our volunteers! Please give a big round of applause for all the volunteers who have given their time, effort, dedication, and so much more to make this program a success. Also, a big round of applause for our generous sponsors, especially our Season Presenting Sponsor, Raytheon Technologies, and our Program Sponsor Qualcomm! Thank you! Before we hand out the awards, I would like to introduce our special guest.

![Figure 120](image) – Press the “View/Print Script” button to view the awards script.

**Gracious Professionalism®** - “Doing your best work while treating others with respect and kindness - It’s what makes FIRST, first.”
14.4. **Presenting the Awards**
Press the “Present Awards” button to begin the presentation process.

![Awards Manager Interface](image)

**Figure 121 – Press “Present Awards” button to begin presenting the awards.**

To reveal an award, simply select the Award name and the Audience Display should display the Award name (but not the users). Selecting the 3rd place winner, will reveal the third-place winner on the Audience Display. Selecting the 2nd Place winner will reveal the second-place winner on the Audience Display. Selecting the 1st Place winner will reveal the first-place winner on the Audience Display. If you’d like to reveal all of the winners at once, simply select the 1st Place winner.

![Awards Results](image)

**Figure 122 - As each winner is revealed, their team number and name are displayed on the Audience Display.**
15. Reviewing Match Results

If you navigate to the event home page, you can select the “Match Results” link under the “Event Info” category to view the Match Results for the currently selected event.

**Figure 123 - Select “Match Results” link to view match results for the currently selected event.**

The Match Results page displays the available match results for the currently selected event. You can press the “Print” button to print these results.

**Figure 124 - You can view and print the match results.**

You can also review the virtual scoresheets for a match by selecting the corresponding “Scoresheet”, “Red” or “Blue” link for the match under the “Score breakdown” column. “Scoresheet” shows the combined scoresheet (Red and Blue), while the “Red” and “Blue” links show the individual scoresheets.
You can review the combined or individual scoresheets for a match. You can also select the "View Match History" link to view how many times the scores for a match were modified and re-committed.

16. Uploading Event Data to FIRST

Once your event has concluded, all event data has been finalized and you have an Internet connection you can send your results. Results for league meets are particularly important because teams’ rankings are based on their previous event results.

- Scorekeepers and event admins will be receiving a reminder email for unpublished events five days after the event.
- If the event is not published within the week, a notice will go to the PDP for any unpublished events in the region.

On the Event Dashboard, select the Send Results to FIRST button:

<table>
<thead>
<tr>
<th></th>
<th>Configure HQ Sync</th>

</tbody>
</table>

*Figure 127 - Dashboard with Send Results to FIRST button.*
Opens the Send Results to FIRST page, select Submit Results.

![Screen shot of Send Results to FIRST page]

*Figure 128 - Press the Submit Results button.*

Successful submit will give a Submission ID. If you need to report any issues or bugs to Github, please include this number.

**Note:** Once you submit, an event cannot be resubmitted. So make sure the event is complete and all data is saved and correct.

![Screen shot of successful submission showing submission ID]

*Figure 129 - Successful submission will give a Submission ID*

If you skipped the Setup Event step, it will prompt you for a key now. It is required for this step.

*Figure 130 - Copy/Paste the region key.*
17. Troubleshooting the System

17.1. Accessing the System Logs
It can be helpful to access the system logs and review messages from the FIRST Tech Challenge Live scorekeeping server. The output from the scorekeeping server is redirected to a text file in a subdirectory within the software directory. To access the log files, in the main program directory the FIRST Tech Challenge Live software look for a subdirectory named “bin”. Double select the “bin” subdirectory to view its contents.

![Open the bin subdirectory.](image1)

Figure 131 - Open the bin subdirectory.

You should now see a directory called “logs”. Double-click on the logs folder to view its contents.

![Double select the "logs" subdirectory.](image2)

Figure 132 - Double select the "logs" subdirectory.

If you have run the software at least one time, then you should see at least one log file in the “logs” subdirectory. Double click a log file to view its contents.
Figure 133 - You should see a listing of log files within the "logs" directory.

Figure 134 - Log files contain useful information for troubleshooting.
